DeepDumps

Premium exam material

Get certification quickly with the **Deep Dumps** Premium exam material.
Everything you need to prepare, learn & pass your certification exam easily.

<https://www.DeepDumps.com>

About DeepDumps

At DeepDumps, we finally had enough of the overpriced, paywall-ridden exam prep industry. Our team of experienced IT professionals spent years navigating the certification landscape, only to realize that most prep materials came with a price tag bigger than the exam itself. We saw aspiring professionals spending more on study guides than on rent, and frankly, it was ridiculous. So, we decided to change the game. DeepDumps was born with one goal: to provide high-quality exam preparation without draining your wallet.

With DeepDumps, you get expert-vetted study materials, real-world insights, and a fair shot at success—without the financial headache..

Doubt Support

We have developed a very scalable solution using which we are able to solve 400+ doubts every single day with an average rating of 4.8 out of 5.

Lifetime Free Updates

We provide lifetime free updates to our customers. To make life easier for our valued customers and fulfill their needs

Free Exam PDF

You are sure to pass the exam completely free of charge

Money Back Guarantee

We Provide 100% money back guarantee to our customer in case of any failure

John

Thank you so much for your help. I scored 972 in my exam today. More than 30 questions were there from your PDFs!

Dana

Thanks a lot for this updated AZ-900 Q&A. I just finished my exam and got 374. I followed both of your AZ-900 videos and the 6 PDF, the PDFs are very accurate, all answers are correct. Could you please create a similar video/PDF for DP900, your content-/PDF's is really awesome. The tem'd a really good job. Thank You 🙏

Ahamod Shibly

Customer support is really fast and friendly, I just finished with me exam I passed it along with the 6 PDF's you

Passed my exam today with 845 marks

Passed my exam today with 845 marks! Out of 52 questions, 51 were from your DeepDumps PDFs including Contoso case study. I will recommend you to my friends. Thank you DeepDumps team!

These questions are real and 100 % valid.

Thank you so much for your efforts, also your 4 PDFs are awesome, I passed the DP900 exam on 1 Sept. With 968 marks. Thanks a lot, buddy!

Esmaria

Simple, easy to understand explanations. To anyone who is writing the exam of AZ900,

ServiceNow

(CIS-DF)

Certified Implementation Specialist-Data Foundations (CMDB and
CSDM)

Question: 1**Deep Dumps**

A CMDB Administrator has built a number of Technology Management Service Offerings (Technical Service Offerings) based on Dynamic CI Groups to better maintain group alignment for the member CI. Which Groups are synced to CIs from the offering that has a relationship to a Dynamic CI Group? (Choose two.)

- A. Approval Group
- B. Managed by Group
- C. Support Group ●
- D. Owned by Group ●

Answer: CD**Question: 2****Deep Dumps****DRAG DROP -**

Drag and drop the application service type to the best description.

Dynamic CI Group	Answer Area	
Service Mapping (Connection Suggestion)		Recommended for mission-critical application services that require a precise approach using patterns
Service Mapping (Top-down)		Best fit to map cloud-native, container-based, or virtual machine environments
Tag-Based		Ideal for custom-built applications and leverages application fingerprinting to generate service maps in a timely manner
		Ideal for small application services that can be easily grouped using filters and CMDB queries

Hand-drawn arrows indicate the following mappings:

- Service Mapping (Connection Suggestion) → Recommended for mission-critical application services that require a precise approach using patterns
- Service Mapping (Top-down) → Best fit to map cloud-native, container-based, or virtual machine environments
- Tag-Based → Ideal for custom-built applications and leverages application fingerprinting to generate service maps in a timely manner
- Dynamic CI Group → Ideal for small application services that can be easily grouped using filters and CMDB queries

Answer:

Dynamic CI Group	Answer Area	
Service Mapping (Connection Suggestion)		Recommended for mission-critical application services that require a precise approach using patterns
Service Mapping (Top-down)		Best fit to map cloud-native, container-based, or virtual machine environments
Tag-Based		Ideal for custom-built applications and leverages application fingerprinting to generate service maps in a timely manner
		Ideal for small application services that can be easily grouped using filters and CMDB queries

Hand-drawn red lines and a black line indicate the following mappings:

- Service Mapping (Connection Suggestion) → Recommended for mission-critical application services that require a precise approach using patterns
- Service Mapping (Top-down) → Best fit to map cloud-native, container-based, or virtual machine environments
- Tag-Based → Ideal for custom-built applications and leverages application fingerprinting to generate service maps in a timely manner
- Dynamic CI Group → Ideal for small application services that can be easily grouped using filters and CMDB queries

Question: 3**Deep Dumps**

A new custom class is needed to reflect a new application being managed in the CMDB. Which roles are minimally needed to add this custom CI class?

- A. A cmdb_inst_admin and personalize_form
- B. itil_admin and personalize_form
- C. data_classification_admin and personalize_dictionary
- D. sn_cmdb_admin and personalize_dictionary ●

Answer: D

Question: 4**Deep Dumps**

What is the relationship between an application and a server?

- A. Application>Used by::Uses>Server
- B. Application> Uses::Used by>Server
- C. Application>Runs::Runs On>Server
- D. Application>Runs on::Runs>Server 

Answer: D**Question: 5****Deep Dumps**

User endpoint devices are imported into the CMDB and populate the 'Assigned to' [assigned_to] field on the Computer [cmdb_ci_computer] CI. The Asset team puts in a request for the Configuration Analysts to populate the 'Assigned to' field on the related Asset.

What action does a Configuration Analyst take to achieve this in an automated way?

- A. Use the Asset-CI Field Mapping module to create a new rule to replicate the 'Assigned to' value between the asset and associated CI 
- B. Hide the 'Assigned to' field on the asset record and create a new field that dot walks to the related CI to get the 'Assigned to' value
- C. Configure a business rule on the computer table to use a script to populate the 'Assigned to' field on the asset based on insert or update in the computer class 'Assigned to' field

Answer: A**Question: 6****Deep Dumps**

A CMDB Administrator needs to create a new CI class for the Internet of Things (IoT) Sensor in ServiceNow. What are the recommended practices for this specific activity? (Choose two.)

- ☒ A. Add a new class under an appropriate parent class
- ☐ B. Modify an existing class
- ☒ C. Install or update the CMDB CI Class Models store application, and verify the class does not already exist
- ☐ D. Delete an unused class, and replace it with the new one

Answer: AC**Question: 7****Deep Dumps**

A Change Manager aims to streamline ITSM processes by automatically populating fields on the Change form when a CI is selected. The Configuration Management team is working to ensure that the Change Group field is populated for all managed CIs.

As a result, which base system field on the incident form will be automatically populated after selecting a CI?

- A. Managed by group
- B. Approval group

C. Assignment group 🗨️

D. Change group

Answer: C

Question: 8

Deep **Dumps**

A Data Center Manager is working with the CMDB CI Class Manager to define the relationship between Application Servers and the Applications they host. The company has multiple Application Servers that host one or more Applications.

Which describes the relationship between the Application Server table ([cmdb_ci_app_server]) and the Application table ([cmdb_ci_appl])?

A. Many-to-one

B. One-to-one

C. One-to-many

D. Many-to-many 🗨️🔴

Answer: C

Question: 9

Deep **Dumps**

A CMDB Administrator needs to identify which attributes have been created specifically for the Windows Server class.

Which tab in the Attributes section is used?

A. All

B. Derived

C. Added 🗨️

D. Child

Answer: C

Question: 10

Deep **Dumps**

An Asset Manager wants to ensure that Asset records and CI records are kept synchronized automatically. How does the Manager do this? (Choose two.)

A. Ensure one-to-one physical mapping between Asset and CI

B. Ensure that scheduled jobs are run during off-business hours to ensure sync happens

C. Ensure that the business rule to update Asset fields on change on the CI table is active 🗨️

D. Ensure that the business rule to update CI fields on change on the asset table is active 🗨️

Answer: CD

Question: 11

Deep **Dumps**

The CMDB Configuration Management team has successfully developed a healthy and trusted CMDB. They have

integrated discovered infrastructure data, accurately referenced non-discoverable data (such as change and support group information), and made the CMDB service-aware using Service Mapping.
Which field on an Incident form is automatically populated after a CI is selected that references an appropriate support group?

- A. Support Group
- B. Approval Group
- C. Change Group
- D. Assignment Group 
- E. Managed by Group

Answer: D

Question: 12

Deep Dumps

A Configuration Management Process Owner is preparing solution options for presentation to the technical governance board for ingesting custom CIs to the CMDB. The solution needs to align with best practice, minimize the cost of future work (technical debt) and ensure compliance with future upgrades.
Which solutions accomplish this? (Choose two.)

- A. Repurposing a base CI class and rename attributes, as required
- B. Extending an existing CI class table to accommodate the custom CI class attributes 
- C. Installing or upgrading the 'CMDB CI Class Models' store application to find a suitable existing CI class accommodating any new attributes 
- D. Extending an existing Asset class table to accommodate the custom CI class attributes

Answer: BC

Question: 13

Deep Dumps

A CMDB Administrator wants only the CIs of Principal Classes to appear in CI reference fields, for example the CI reference fields accessible from an Incident Form.
Where does the CMDB Administrator designate Principal Classes?

- A. CI Class Manager 
- B. CMDB Workspace
- C. CMDB Data Manager
- D. System Properties

Answer: A

Question: 14

Deep Dumps

A Configuration Manager is managing a CI class in the CMDB. The identification rule(s) needs an update.

Where can the Configuration Manager view and configure the existing identification rule(s) for the class? (Choose two.)

- A. CI Identifiers module 
- B. API Integrations
- C. IRE Application

Answer: AD

Question: 15

Deep Dumps

A CMDB Administrator wants to ensure that only relevant CIs from managed classes will be shown on Incident, Problem, and Change records.

Which checkbox needs to be checked in the CI Class Manager for the CMDB Administrator to achieve the requested result?

- A. Principal Class 
- B. Independent
- C. Main Record
- D. Extensible

Answer: A

Question: 16

Deep Dumps

A Configuration Management team has decided to start taking advantage of the CMDB 360/Multisource CMDB functionality.

Which system property must be enabled?

- A. glide.identification_engine.multisource_enabled 
- B. glide.identification_engine.multisource.query.max.limit
- C. glide.identification_engine.multisource_non_cmdb_ci_enabled
- D. glide.identification_engine.multisource_cmdb_ci_enabled

Answer: A

Question: 17

Deep Dumps

A CMDB Administrator is creating technical documentation for stakeholders, which includes a list of attributes, Identification and Reconciliation Engine (IRE) rules, and suggested relationships for several classes.

Which central location does the CMDB Administrator use to collect this information?

- A. CI Class Manager 
- B. CI Identifiers
- C. CMDB Workspace
- D. CMDB Data Manager

Answer: A

Question: 18

Deep Dumps

A CMDB Administrator wants to configure IRE rules for the CMDB. The CMDB Administrator opens CI Class Manager and sees the Health Inclusions Rules tab available under a CI Class.

How are these rules utilized by the IRE?

- A. To narrow the scope of CIs included in the identification process 🐼
- B. To reduce the data ingested into the CMDB
- C. To reconcile specific attributes based on data sources

Answer: A

Question: 19

Deep Dumps

A Windows administration team wants a grouping of CIs using CMDB groups.

Which methods can be used? (Choose two.)

- A. Tag-based queries 🐼🐼
- B. Scripted queries
- C. Saved queries
- D. Encoded queries 🐼🐼

Answer: BC

Question: 20

Deep Dumps

A CMDB Administrator is managing group data from both the CI Class Manager and a Technical Service Offering for a specific class.

CI Class Manager:

- Managed by Group = Enterprise IT Services

Technical Service Offering:

- Managed by Group = Windows Support

- Change Group = Change Management Team

What would be the Managed By Group for CIs from this class based on the configured values?

- A. Windows Support 🐼
- B. Enterprise IT Services
- C. Change Management Team

Answer: A

Question: 21

Deep Dumps

A Configuration Manager wants to manage manually maintained data attributes of CIs.

Which group values are automatically synchronized on CIs using Technology Management Offerings (Technical Service Offerings) and dynamic CI groups? (Choose two.)

- A. Change group 🐼

- B. Approval group
- C. Support group
- D. CMDB group

Answer: AC

Question: 22

Deep Dumps

A CMDB Administrator is tasked with managing the CMDB and needs to define a new CI class to track a new type of equipment that has not been seen before.

Which action adds a new CI class and ensures it integrates properly with the existing CMDB structure?

- A. Use Service Catalog to define the new CI class, as the CI Class Manager is only for service-related records and not for hardware CIs
- B. Edit an existing CI class under CI Class Manager and add new fields specific to the new equipment type
- C. Create a new CI class directly in the CI Class Manager and configure the table inheritance to ensure it inherits from a relevant parent class
- D. Use the CI Class Manager to create a new CI class but avoid setting up any inheritance, as CI classes should be independent of one another to maintain clarity

Answer: C

Question: 23

Deep Dumps

A Configuration Manager needs to restrict the number of classes available in a Configuration Item reference field on an incident form.

How does the Manager set Principal Classes?

- A. By using the Principal Class check box on the CI Class Manager's 'Basic Info' tab for a Class
- B. By using the Principal Class check box on the CI Class Manager's 'Attributes' tab for a Class
- C. By using the Principal Class attribute on the CI
- D. By using the Principal Class check box on the CMDB Workspace

Answer: A

Question: 24

Deep Dumps

A CMDB Administrator aims to utilize CSDM life cycle field mappings to better align with CSDM best practices.

What is the next step to take after selecting the Enable Life Cycle Sync button?

- A. Resolve any incomplete field mappings identified in the Discrepancy Report
- B. Fix the incorrect values in the Life Cycle Stage to match legacy values
- C. Activate the CSDM Life Cycle field mappings

Answer: A

Question: 25**Deep Dumps**

A CMDB Administrator needs to set a CI Class as a Principal Class.

Which CI Class Manager tab would need to be accessed?

- A. Health > Attributes
- B. Class Info > Attributes
- C. Class Info > Basic Info ☒

Answer: C

Question: 26**Deep Dumps**

A ServiceNow Administrator needs to create multiple new classes in the CMDB but wants to follow ServiceNow's best practices for naming CMDB tables to prevent technical debt.

Which is the starting prefix for all custom CMDB tables?

- A. ci_cmdb
- B. cmdb_ci
- C. u_cmdb_ci ☒
- D. u_ci_cmdb

Answer: C

Question: 27**Deep Dumps**

A Configuration Management team needs to prevent duplicate server records to avoid confusion among users. Server records are identified when they are processed via the Identification and Reconciliation Engine (IRE) using the configured identification rules.

Where would these rules be configured?

- A. CMDB Workspace
- B. CMDB CI Class Manager ☒
- C. CMDB Health Dashboard
- D. CMDB Data Manager

Answer: B

Question: 28**Deep Dumps**

A CMDB Administrator notices that CIs do not have a support group.

How can the support group be automatically populated and maintained on the CI record?

- A. Technology Management Service Offering (Technical Service Offering) ☒
- B. Technology Management Service (Technical Service)
- C. CI Class Manager
- D. Dynamic CI group

Answer: A

Question: 29

Deep Dumps

Using CI Class Manager, the Tomcat identification rule has the following criterion attributes configured:

- Class
- Install Directory

Which identifier entry configuration option must be checked to attempt a match using the Application identification rule if no match is found using the Tomcat identification rule?

- A. Allow fallback to parent's rules ☒
- B. Independent
- C. Applies to
- D. Criterion attributes

Answer: A

Question: 30

Deep Dumps

A CMDB CI Class Owner has been asked to change the icon for the UNIX Server class.

Which CI Class Manager tab can the owner use to change the icon for the class?

- A. CI List
- B. Basic Info ☒
- C. Attributes
- D. Suggested Relationships

Answer: B

Question: 31

Deep Dumps

A Configuration Manager is reviewing the life cycle of CIs to ensure data accuracy, consistency, and relevance. The manager reviews the legacy status values and their equivalent CSDM life cycle stage and life cycle stage status values.

Where are these reviewed?

- A. Life cycle choice list
- B. Life cycle mappings ☒
- C. Life cycle properties

Answer: B

Question: 32

Deep Dumps

An organization is updating the CMDB to include new asset types like IoT devices. Relevant CI classes need to be

added and outdated ones need to be removed from the Principal Class filter to ensure accurate display in ITSM processes.

Which roles are needed to add or remove classes? (Choose two.)

- A. personalize_dictionary 
- B. sn_csdm_admin  
- C. sn_cmdb_admin
- D. cmdb_query_builder

Answer: BC

Question: 33

Deep Dumps

An IT group has a requirement to upgrade all the Windows servers. There is a Dynamic CI Group containing all the Windows servers.

What happens to the Dynamic CI Group when it is referenced from the Configuration Item field on a Change form?

- A. It displays all related CIs in the Impacted Services related list.
- B. It calculates impact against the Dynamic CI Group.
- C. It displays all related CIs in the Affected CIs related list.

Answer: C

Question: 34

Deep Dumps

A CMDB Administrator is working in the CI Class Manager on the Basic Info tab.

How can the class be set as a Principal Class?

- A. Check the Principal Class check box 
- B. Click the Principal Class UI Action button
- C. Select 'Yes' from the Principal Class choice list

Answer: A

Question: 35

Deep Dumps

A global enterprise integrates data from multiple discovery sources such as ServiceNow Discovery, SCCM, AWS, and manual uploads to populate its CMDB. However, each discovery source categorizes the same CIs differently, leading to duplicate records and inconsistencies across the system. As a result, the CMDB team is struggling with data accuracy and standardization.

What actions does the CMDB team take to resolve the issue? (Choose two.)

- A. Allow each discovery source to define its own CI class, even if it results in inconsistencies
-  B. Implement and use identification and reconciliation rules to avoid duplicates and standardize CI classification
- C. Create a custom script to manually adjust incoming data before storing it in the CMDB
-  D. Use CI Class Manager to establish standardized CI classes and attributes across all discovery sources

Answer: BD

Question: 36

Deep Dumps

A CMDB CI Class Owner responsible for the Windows Servers needs to manage the Windows Server class.

Which CI Class Manager feature will help the CI Class Owner streamline this task?

- A. Pinned Classes ☒
- B. CI Favorites
- C. Search CI Classes

Answer: A

Question: 37

Deep Dumps

The Change Management team in an organization wants to implement a Change across multiple CIs at the same time.

Which field on the Change Request form needs to be populated with a dynamic CI group?

- A. Configuration Item ☒
- B. Business Service
- C. Service Offering

Answer: A

Question: 38

Deep Dumps

A CMDB Administrator needs to configure a new application identification rule that considers the potential for the same application installed more than once on the same server.

Which is the best choice of a criterion attribute?

- A. Version
- B. Configuration File Name
- C. Port
- D. Configuration File Path ☒
- E. Class

Answer: D

Question: 39

Deep Dumps

The CMDB Administrator has set-up two Dynamic Reconciliation Rules within the ServiceNow Production Instance. The 'Server' class has a Dynamic Reconciliation Rule of largest value for the RAM field. The 'Windows Server' class has a Dynamic Reconciliation Rule of most reported for the RAM field.

Discovery Source	RAM (MB)
Tivoli	4.096
ServiceNow	4.096
LANDesk	2.048
Altiris	8.192

Given the above data in the Multisource CMDB, which value would be added to the CMDB for RAM for a 'Server' CI?

- A. 4.096 MB
- B. 8.192 MB
- C. 2.048 MB

Answer: B

Question: 40

Deep Dumps

A CMDB Administrator needs to import external data into the CMDB. As the CMDB Administrator wants to reduce the risk for creating duplicates and to update information from unauthorized sources, it has to be ensured that the Identification and Reconciliation API will not be bypassed.

What is the recommended method to import data into the CMDB utilizing the Identification and Reconciliation API?

- A. IntegrationHub ETL ☒
- B. Table API (REST API or SOAP API)
- C. Import Sets and Transform Maps

Answer: A

Question: 41

Deep Dumps

A Configuration Manager has configured a multiple data sources which are all authorized to update the same class and the same set of class attributes in the CMDB.

What can the Configuration Manager do to control which data source should be authoritative source of truth for a specific class of set of class attributes?

- A. Assign a priority to each data source in the reconciliation rules ☒
- B. Manually run the data source updates in the correct order
- C. Configure data refresh rules with a specific time period
- D. Assign a run order to each data source in the identification rules

Answer: A

Question: 42**Deep Dumps**

Which CMDB 360/Multisource CMDB the Dynamic Reconciliation Rules will also be enabled. Based on the request of the management, a CMDB Administrator has to set up multiple Dynamic Reconciliation Rules. Which are available 'Dynamic Rule Types' within the 'Create Reconciliation Rule' wizard? (Choose two.)

- A. Last Updated 
- B. Smallest Value
- C. Last Created
- D. Most Reported 

Answer: BD**Question: 43****Deep Dumps**

The following identification rule for a CI class has been defined:

Hardware Rule: Identifier Entries Table	Criterion attributes	Priority
Serial Number	serial_number, serial_number_type	100
Hardware	serial_number	200
Hardware	name	300
Network Adapter	mac_address, name	400

Two new CI records are imported into the hardware class of the CMDB:

CI1: The name of this CI record matches the name of an existing CI record in the CMDB.

CI2: The IP address of this CI record matches the IP address of an existing CI record in the CMDB.

Which is correct based on the identification rule and the imported CI records?

- A. CI1 will be inserted as new record and CI2 will be updated with matching record.
-  B. CI1 will be updated with matching record and CI2 will be inserted as new record.
- C. CI1 and CI2 both will be updated with matching records.
- D. CI1 and CI2 both will be inserted as new records.

Answer: B**Question: 44****Deep Dumps**

A customer wants recently imported server records to be automatically reclassified into more specific CMDB

classes after being discovered using ServiceNow Discovery.

During the discovery process, if existing Server [cmdb_ci_server] records are reclassified into the Linux [cmdb_ci_linux_server] and Windows Server [cmdb_ci_win_server] classes, which reclassification operation occurred?

- A. Class Upgrade 
- B. Class Downgrade
- C. Class Switch

Answer: A

Question: 45

Deep Dumps

A Platform Data Owner wants to improve data quality with a few reconciliation rules across the five discovery sources that are being used. The Data Owner knows the best option is to include CMDB 360/Multisource CMDB to manage and monitor discovery sources, but the company currently does not have a license for ITOM Discovery that is required for CMDB 360/Multisource CMDB.

What can the Data Owner do in this case?

- A. ITOM Discovery needs to be purchased to take advantage of the multisource IRE Rules.
- B. CMDB 360/Multisource is a platform product that can be used immediately.
- C. The IRE reconciliation rules can use discovery source regardless of CMDB 360 being enabled. 

Answer: C

Question: 46

Deep Dumps

Which ServiceNow solution creates automatic relationships?

- A. IntegrationHub ETL
- B. Discovery 
- C. Workflow Studio
- D. Service Mapping 

Answer: D

Question: 47

Deep Dumps

The Apache Web Server Identification Rule is configured with the following Criterion attributes:

Class -

Configuration file -

Version -

Identifier Entry
sys_class_name,config_file,version

* Identifier

* Search on table

* Criterion attributes

Class, Configuration file, Version

Priority

Optional condition

Yesterday, an Apache Web Server CI was discovered as part of Service Mapping. Today, the application owner upgraded Apache to a different version and reran discovery of the service. What will happen in the CMDB?

- A. The existing Apache Web Server CI will be reconciled and its version will be updated. 🍌
- B. A duplication error will occur.
- C. The Apache Web Server CI will be reclassified as a Web Server CI.
- D. A new Apache Web Server CI is created.

Answer: A

Question: 48

Deep Dumps

Configuration Management requires an accurate inventory of devices to be reflected in the CMDB. Which are common use cases for using Agent Client Collector (ACC)? (Choose two.)

- A. Network devices in the DMZ
- B. Devices that intermittently connect to the network 🍌
- C. Servers in the data center
- D. Devices in secure environments 🍌

Answer: BD

Question: 49

Deep Dumps

An organization needs to maintain non-discoverable attributes, such as warranty expiration dates, for hardware CIs. These attributes are not updated by automated discovery tools. What method ensures these attributes are accurately maintained for all CIs?

- A. Create a new CI class specifically for non-discoverable attributes
- B. Use the CMDB Reconciliation Engine to update the attributes
- C. Use a scheduled data import to update the attributes from an external source 🍌

Answer: C

Question: 50**Deep Dumps**

DRAG DROP -

ServiceNow provides a suite of CMDB management tools designed to effectively ingest, manage, and maintain CIs and relationships.

Drag and drop the design architecture to its management tool.

Some options may not apply.

	Answer Area	
Organization-built solution using transform maps		Agent Client Collector
Automated agent-based solution running patterns		Import Sets
Automated agentless solution running patterns Automated agentless solution running patterns		Service Graph Connector
Third-party integrations from other vendors		ServiceNow Discovery
Pre-built store integration solutions that require minimal customization		

Answer:

	Answer Area	
Organization-built solution using transform maps		Agent Client Collector
Automated agent-based solution running patterns		Import Sets
Automated agentless solution running patterns Automated agentless solution running patterns		Service Graph Connector
Third-party integrations from other vendors		ServiceNow Discovery
Pre-built store integration solutions that require minimal customization		

Question: 51**Deep Dumps**

When integrating data into the CMDB using import sets and transform maps, which type of script is added to ensure the data is processed through the IRE?

- A. onBefore
- B. onComplete
- C. onStart
- D. onAfter

Answer: A**Question: 52****Deep Dumps**

The following Reconciliation Rules were configured for ServiceNow, Altiris, and SCCM:

Discovery Source	Class	Priority
ServiceNow	Windows Server [cmdb_ci_win_server]	100
Altiris	Windows Server [cmdb_ci_win_server]	200
SCCM	Windows Server [cmdb_ci_win_server]	300

Which are true? (Choose two.)

- A. Data collected with a discovery source of SCCM can update any record in the Windows Server [cmdb_ci_win_server] table because it has the highest priority number.
- B. Data collected with a discovery source of ServiceNow can insert new records into the Windows Server [cmdb_ci_win_server] table, but cannot update records created by Altiris or SCCM.
- C. Data collected with a discovery source of Altiris can update records inserted by SCCM into the Windows Server [cmdb_ci_win_server] table.
- D. Data collected with a discovery source of SCCM can be inserted as new records in the Windows Server [cmdb_ci_win_server] table.

Answer: CD

Question: 53

Deep Dumps

A CMDB Administrator has installed a Service Graph Connector and customized a script transform. What will happen on subsequent upgrades if the default definition of the script transform is updated?

- A. A skipped change is created and no change is made the script transform definition.
- B. The Service Graph Connector upgrade refuses to start.
- C. The upgrade stops and reports an error.

Answer: A

Question: 54

Deep Dumps

A Windows server is reclassified from the Server table [cmdb_ci_server] to the Windows Server table [cmdb_ci_win_server] when processed through the Identification and Reconciliation Engine (IRE).

Which process occurred?

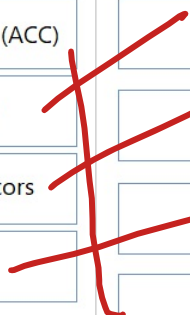

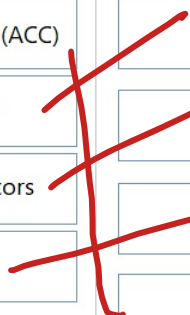

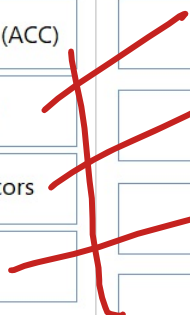

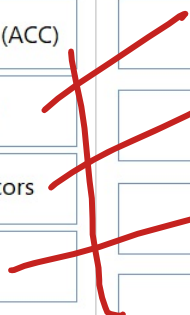

- A. Class Change
- B. Class Switch
- C. Class Downgrade

Answer: D**Question: 55****Deep Dumps**

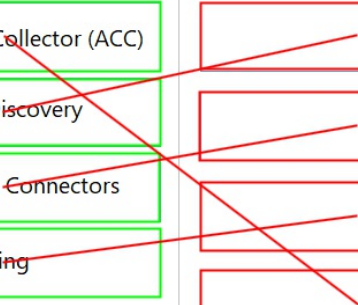

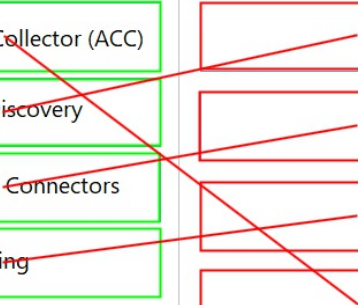

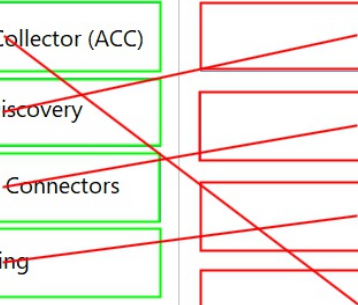

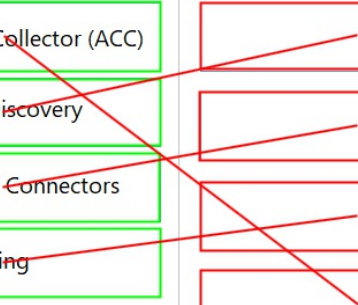

DRAG DROP

-

Drag and drop the product to its description.

	Answer Area	
Agent Client Collector (ACC)		Automatically identifies devices and applications in the network, populating the CMDB with accurate and up-to-date information
ServiceNow Discovery		Facilitates integration between ServiceNow and external systems to import and synchronize data
Service Graph Connectors		Complete topology of the services and shows how they are supported by underlying infrastructure and applications
Service Mapping		Provides real-time visibility into endpoint configurations, populating the CMDB with accurate and up-to-date information

Answer:

	Answer Area	
Agent Client Collector (ACC)		Automatically identifies devices and applications in the network, populating the CMDB with accurate and up-to-date information
ServiceNow Discovery		Facilitates integration between ServiceNow and external systems to import and synchronize data
Service Graph Connectors		Complete topology of the services and shows how they are supported by underlying infrastructure and applications
Service Mapping		Provides real-time visibility into endpoint configurations, populating the CMDB with accurate and up-to-date information

Question: 56**Deep Dumps**

An organization utilizes multiple data sources to update its CMDB, each assigned a different priority level. A high-priority data source is scheduled to update server records weekly. However, due to an integration issue, the high-priority data source stops updating the records.

Which configuration can be used to allow a lower-priority data source to update records after a specified period of inactivity from the higher-priority source?

- A. Data Refresh Rules 
- B. Reconciliation Rules
- C. Health Inclusion Rules
- D. Identification Rules

Answer: A

Question: 57**Deep Dumps**

A CMDB Administrator has imported data into the ServiceNow CMDB from a third-party source using a Service Graph Connector. The Administrator wants to review specific field to field mappings for the import.

Which feature will show that information?

- A. Integration Hub
- B. IntegrationHub ETL 
- C. CMDB Integrations Dashboard

Answer: B**Question: 58****Deep Dumps**

What are the characteristics or functions of ServiceNow IntegrationHub ETL? (Choose two.)

-  A. Integrates third-party data into the CMDB or into non-CM DB tables
-  B. Uses the IRE to process and integrate data
- C. Imports Microsoft SCCM/Intune data into the CMDB
- D. Performs discovery data collection and updates the CMDB

Answer: AB**Question: 59****Deep Dumps**

A CMDB Administrator needs to ingest relevant data from Microsoft SCCM into the CMDB.

Which ingestion method brings the fastest time to value?

- A. Import Sets
- B. Service Graph Connectors 
- C. Agent Client Collector
- D. IntegrationHub ETL

Answer: B**Question: 60****Deep Dumps**

A CMDB Administrator changes the query for the SCCM Service Graph Connector.

What is the impact of this change?

- A. Any Scheduled Jobs for the SCCM Service Graph Connector will need to be configured. 
- B. Any updates for the SCCM Service Graph Connector will be skipped during the upgrade. 
- C. The Data Source for the SCCM Service Graph Connector will be marked as Inactive.

Answer: B

Question: 61**Deep Dumps**

A CMDB Administrator needs to prevent duplicate CI creation from import sets that load data into the CMDB from vendor shipment files containing CI information.

How can the Administrator do this?

- A. Set the coalesce on two mappings within the transform map ☐
- B. Create comparison rules in the IRE ☐
- C. Set the system property to utilize the IRE within transform maps ☐
- D. Use the CMDBTransformUtil API in the transform script ☒

Answer: D**Question: 62****Deep Dumps**

A ServiceNow Administrator wants to implement Service Graph Connectors to provide integrations to many third-party solutions that the company wants integrated into the CMDB.

Which categories of connectors are available to the Administrator? (Choose two.)

- A. DevOps ☐
- B. Cloud ☒
- C. Workflow Automation ☐
- D. Observability ☒

Answer: BD**Question: 63****Deep Dumps**

The Server [cmdb_ci_server] class uses a dynamic reconciliation rule of lowest value for the Disk Space (GB) field, while the Windows Server [cmdb_ci_win_server] class uses a dynamic reconciliation rule of most reported for the Disk Space (GB) field.

Given the following data sources that populate Windows Server data into the CMDB 360/Multisource CMDB:

Data Source	Disk Space (GB)
Tivoli	75
ServiceNow	75
LANDesk	50
Altiris	80

Which value would be added to the CMDB for the Disk Space (GB) field of a Windows Server [cmdb_ci_win_server] record?

- A. 80 ☐
- B. 75 ☒
- C. 50 ☐

Answer: B

Question: 64

Deep Dumps

A Configuration Manager needs to ingest third-party CIs into the CMDB.

Which method minimizes the risk of technical debt?

- A. Vendor-provided integration
- B. Table API
- C. Service Graph Connector 
- D. Import Sets and Transform Maps

Answer: C

Question: 65

Deep Dumps

Which ServiceNow solutions automatically create relationships between CI Applications that are part of an Application Service? (Choose two.)

- A. IntegrationHub ETL
- B. Event Management
- C. Discovery 
- D. Service Mapping 
- E. Data Manager

Answer: CD

Question: 66

Deep Dumps

A CMDB Administrator wants to leverage dynamic reconciliation rules.

Which feature must be enabled?

- A. CMDB Data Manager
- B. CMDB 360/Multisource CMDB 
- C. CMDB Workspace
- D. Reconciliation Rules

Answer: B

Question: 67

Deep Dumps

A CMDB Administrator needs the fastest time to value solution for effectively ingesting, managing, and maintaining CIs and relationships.

Which management tool will accomplish this to import Windows computer data from SCCM?

- A. IntegrationHub ETL connection to SCCM using Robust Transform Engine (RTE)
- B. Import set using JDBC data source connection to SCCM using transform maps
- C. SCCM Service Graph Connector ☒
- D. SCCM Usage Metering Spoke

Answer: C

Question: 68

Deep **Dumps**

A CMDB Administrator has installed a Service Graph Connector (SGC), and then made customizations to the mappings.

Which is a consequence of this action?

- A. Fields populated by a customization will have a special tag associated with them in the CMDB.
- B. The customization will prevent the SGC from executing without an approval record attached to the affected mapping record.
- C. The customized mappings are not supported by ServiceNow, and the customer is responsible for supporting their own customized SGC. ☒

Answer: C

Question: 69

Deep **Dumps**

A CMDB Data Owner has requested better insights on the different data sources that make up the CMDB data set. The Platform Owner knows that the new Service Graph Connector Central plugin is just what is needed.

After installing the plugin, what workspace will have the new Service Graph Connector Central tab available?

- A. Discovery Admin Workspace
- B. CMDB Workspace ☒
- C. Service Graph Connector Workspace

Answer: B

Question: 70

Deep **Dumps**

A CMDB Administrator would like to minimize stale CIs in the CMDB. Which CMDB Health Dashboard scorecard displays this information?

- A. Correctness ☒
- B. Compliance
- C. Completeness

Answer: A

Question: 71

Deep **Dumps**

DRAG DROP -

Drag and drop the CMDB Health Dashboard metric to the description.

	Answer Area	
Audits		Use these to compare actual values with expected values
Duplicate CIs		Use of these should be minimized
Orphan CIs		Certain attribute values are not set, or relationships are missing
Recommended fields		Preferable for them to be populated, as they could be useful in troubleshooting issues
Required fields		Have not been updated and may be outdated
Stale CIs		Detected during identification and reconciliation and have associated base system remediation tools

Answer:

	Answer Area	
Audits		Use these to compare actual values with expected values
Duplicate CIs		Use of these should be minimized
Orphan CIs		Certain attribute values are not set, or relationships are missing
Recommended fields		Preferable for them to be populated, as they could be useful in troubleshooting issues
Required fields		Have not been updated and may be outdated
Stale CIs		Detected during identification and reconciliation and have associated base system remediation tools

Question: 72

Deep Dumps

A CMDB Administrator is asked to clean up the CMDB duplicates. What is the preferred way to manage this task?

- A. My Tasks in the Application Navigator
- B. The de-duplication task module
- C. The de-duplication dashboard on the CMDB workspace

Answer: B

Question: 73

Deep Dumps

A CMDB Administrator identifies duplicate CIs. One was created by a manual import, and the other one was created by automated discovery. The discovered CI has the latest IP address, while the manually imported CI has an accurate relationship to a critical business application.

How does the Administrator use the Duplicate CI Remediator to resolve this issue?

- A. Retain the manually imported CI, and delete the discovered CI

- B. Merge the two CIs automatically, retaining all attributes from the discovered CI
- C. Retain the discovered CI, but merge the relationship from the manually imported CI 
- D. Retain the discovered CI, and delete the manually imported CI

Answer: C

Question: 74

Deep **Dumps**

A CMDB Administrator wants to remove all Linux Servers in the organization that have not been updated in six months.

Which recommended action does the Administrator take in Data Manager?

- A. Create a business rule
- B. Create an archive policy 
- C. Create a scheduled job

Answer: B

Question: 75

Deep **Dumps**

The CMDB Administrator group aims to display meaningful results on the CMDB Health Dashboard Compliance Scorecard for server records that are not on the latest patch.

What must be configured to achieve this goal?

- A. Certification Policies, Data Filters, Scheduled Jobs 
- B. Stale, Orphan, Duplicate
- C. Certification Filter, Certification Template, Audit
- D. Technical Service Offerings, Dynamic CI Groups, CMDB Groups

Answer: C

Question: 76

Deep **Dumps**

A CMDB Administrator has been tasked with gathering information for a presentation to leadership. The Administrator needs to provide Duplicate CI, Orphan CI, and Stale CI metrics.

Which scorecard provides this information on the CMDB Health Dashboard?

- A. Completeness
- B. Compliance
- C. Correctness 

Answer: C

Question: 77

Deep **Dumps**

What is the difference between Data Certification and Attestation policies when managing a CI?

- A. Attestation requires correcting specific attributes of a CI, while Data Certification tracks acknowledgement

the CI still exists.

B. Attestation can be scheduled, while Data Certification cannot be scheduled.

C. Attestation tracks acknowledgement the CI still exists, while Data Certification requires validating specific attributes of a CI. 🐼

D. Attestation can be assigned to a Group or an individual, while Data Certification can only be assigned to an individual.

Answer: C

Question: 78

Deep Dumps

A CMDB Administrator is reviewing the health of the CMDB and notices a large percentage of the Hardware CIs are missing serial numbers. The Administrator is concerned this may cause duplicate CIs and would like to resolve the issue in a timely manner.

What structured guidelines provided by ServiceNow are available to troubleshoot and resolve the issue?

A. CMDB Health Dashboards Playbooks 🐼

B. CSDM Now Create Playbooks

C. CSDB Data Foundations Dashboard Playbooks

D. CSDM Data Foundations Dashboard Playbooks

Answer: A

Question: 79

Deep Dumps

Configuration Management needs to ensure data quality for all CIs in the CMDB.

What areas of data quality for CIs are in the CMDB Health Dashboard? (Choose two.)

A. Missing CIs

B. State CIs 🐼

C. Duplicate CIs 🐼

D. Downgraded CIs

E. Upgraded CIs

Answer: AC

Question: 80

Deep Dumps

A CMDB Configuration Manager is reviewing the metrics on the CMDB Health Dashboard's Correctness Scorecard for the Server class which consists of a total of 60,000 servers in the CMDB.

For the Duplicate metric, it shows Healthy CIs/Evaluated as 59,000/60,000.

For the Orphan metric, it shows Healthy CIs/Evaluated as 45,000/50,000.

Which configuration explains the difference in the scope of Server CIs (60,000 vs. 50,000) evaluated between the two metrics?

A. The Duplicate metric has a CMDB Group configured for the Server class.

B. The Duplicate metric has a Health Inclusion rule configured for the Server class.

C. The Orphan metric has a Health Inclusion rule configured for the Server class. 🐼

D. The Orphan metric has a CMDB Group configured for the Server class.

Answer: C

Question: 81

Deep Dumps

CMDB class owners are receiving tasks under the 'My Work' tab in the CMDB Workspace. Which CMDB management tool is generating these tasks?

- A. CMDB Data Manager  
- B. De-duplication templates
- C. CMDB Health Dashboard 

Answer: C

Question: 82

Deep Dumps

What ensures data volume in the CMDB manageable?

- A. Scheduled Jobs
- B. Archive Policies 
- C. Business Rules

Answer: B

Question: 83

Deep Dumps

A CMDB Manager wants to improve data quality using the CMDB Health Dashboard. What needs to happen to generate CMDB health scores?

- A. Nothing, CMDB health scores are calculated by default
- B. The plugin, CMDB health calculation, needs to be installed
- C. The scheduled jobs for the CMDB Health Dashboard must be activated 

Answer: C

Question: 84

Deep Dumps

The CMDB Configuration Manager is using the CI Class Manager to manage the group ownership of CI classes and needs to leverage the ownership value specified in the CI Class Manager. When configuring a CMDB Data Manager policy, which group reference field should be set?

- A. Change Group
- B. Approval Group
- C. Managed By Group 
- D. Support Group

Answer: C

Question: 85**Deep Dumps**

The CMDB Configuration Management team wants to manage de-duplication tasks generated from data ingested into the CMDB via the Identification and Reconciliation Engine (IRE).
In which area of the CMDB Workspace can they locate these de-duplication tasks?

- A. Important actions tile under the Home tab
- B. CMDB feature adoption tile under the Insight tab
- C. Total status tile under the My Work tab

Answer: C**Question: 86****Deep Dumps**

Which type of CMDB Data Manager policy creates tasks that allow the assigned individual to update fields on the CI record?

- A. Compliance
- B. Certification
- C. Attestation
- D. Audit

Answer: B**Question: 87****Deep Dumps**

DRAG DROP -

A new ServiceNow customer is assembling a Configuration Management team to support their CMDB.
Drag each role to its corresponding job description.

Role	Answer Area	Description
CI Analyst		Has read-only access to CMDB data and to basic user interface such as CMDB reports and dashboards
CMDB Process Owner		
Configuration Manager/CMDB Admin		Accountable for managing all elements that make up a portfolio throughout their entire lifecycle
Service or Product Owner		Manages assigned CI tables and keeps records updated and resolves tasks related to CMDB records
		Obtains highest level role for CMDB privileges

Answer:

Role	Answer Area	Description
CI Analyst		Has read-only access to CMDB data and to basic user interface such as CMDB reports and dashboards
CMDB Process Owner		
Configuration Manager/CMDB Admin		Accountable for managing all elements that make up a portfolio throughout their entire lifecycle
Service or Product Owner		Manages assigned CI tables and keeps records updated and resolves tasks related to CMDB records
		Obtains highest level role for CMDB privileges

Question: 88**Deep Dumps**

DRAG DROP -

A CMDB Administrator seeks to understand the available tools for preventing, addressing, and remediating duplicate CIs.

Drag and drop each feature with the corresponding outcome.

Some options may not apply.

	Answer Area	
Certification Tasks		Can be assigned to groups for resolving duplicate CIs
CMDB Health Dashboard Correctness Scorecard		Offers insight into duplicate CIs within the CMDB
De-Duplication Tasks		Offers a solution to resolve de-duplication tasks in bulk
De-Duplication Templates		Provides a wizard to resolve de-duplication tasks individually
Duplicate CI Remediator		

Answer:

	Answer Area	
Certification Tasks		Can be assigned to groups for resolving duplicate CIs
CMDB Health Dashboard Correctness Scorecard		Offers insight into duplicate CIs within the CMDB
De-Duplication Tasks		Offers a solution to resolve de-duplication tasks in bulk
De-Duplication Templates		Provides a wizard to resolve de-duplication tasks individually
Duplicate CI Remediator		

Question: 89**Deep Dumps**

A Configuration Manager needs to leverage a policy type to automate the creation and assignment of tasks to validate the existence of CIs.

Which policy type should be used to accomplish this goal?

- A. Retire
- B. Certification
- C. Delete
- D. Attestation

Answer: D**Question: 90****Deep Dumps**

Which is a purpose or requirement of CMDB Data Manager in ServiceNow?

- A. Encrypts archived records for enhanced security
- B. Automates the enforcement of relationship rules between CIs in the CMDB
- C. Automates the archival and deletion of records based on retention policies

Answer: C

Question: 91**Deep Dumps**

A CMDB Data Manager needs to access the ServiceNow platform to create, publish, and manage policies that automate and govern CI lifecycle operations, ensuring the CMDB remains healthy and efficient. Where can the Data Manager do this?

- A. CMDB Workspace Management tab 
- B. Service Operations Workspace
- C. CMDB Workspace CMDB 360 tab
- D. CI Class Manager

Answer: A**Question: 92****Deep Dumps**

A CMDB Administrator wants to ensure all short-lived CIs that have not been discovered in the past week are removed.

After retiring the CI records, which recommended action does the CMDB Administrator take?

- A. Create a delete policy 
- B. Create a business rule
- C. Create a scheduled job

Answer: C**Question: 93****Deep Dumps**

A CMDB Administrator has taken over management of a ServiceNow instance and has determined there are multiple deficiencies in the CMDB. During review of the CMDB Data Foundations Dashboard, the Administrator sees that ServiceNow offers Remediation Playbooks.

How can Playbooks assist the Administrator in resolving these issues?

- A. Playbooks can be installed in the instance to automatically fix issues.
- B. Playbooks can help analyze and fix issues. 
- C. Playbooks can automatically track common CMDB issues and output metrics.

Answer: B**Question: 94****Deep Dumps**

A CMDB Administrator utilizing the CMDB Data Foundations Dashboard sees an issue and wants to run a playbook.

Which types of documentation can they expect to be provided in a playbook? (Choose two.)

- A. Root Cause
- B. Automated Remediations
- C. Problem Analysis 

Answer: CD

Question: 95

Deep Dumps

A CMDB Administrator is considering whether to start using the playbooks provided on the CMDB Data Foundation Dashboard.

What are the benefits to support the decision to leverage this feature? (Choose two.)

- A. Offers automated scripts to resolve poorly performing metrics
- B. Offers insight into the downstream impacts of poorly performing metrics
- C. Offers remediation options to address and improve poorly performing metrics 
- D. Offers remediation templates to improve poorly performing metrics 

Answer: BC

Question: 96

Deep Dumps

A CMDB Administrator is beginning the journey of populating the CMDB and needs to verify that any data which is no longer useful/applicable is removed.

Which governance management tool will accomplish this?

- A. CI Class Manager
- B. CMDB and CSDM Data Foundations Dashboard
- C. CMDB Data Manager 
- D. De-duplication Templates
- E. CMDB Health Dashboard

Answer: C

Question: 97

Deep Dumps

The CMDB Administrator wants to leverage the Staleness metric from the CMDB Health Dashboard - Correctness Scorecard.

Which field is used to calculate the duration of this metric?

- A. Updated (sys_updated_on)
- B. Created (sys_created_on)
- C. Last modified on (last_modified)
- D. Most recent discovery (last_discovery) 
- E. First discovered (first_discovered)

Answer: D

Question: 98**Deep Dumps**

A data center has many servers. The CMDB Administrator wants to confirm that all servers exist.

Which Data Manager policy type does the Administrator implement?

- A. Attestation ☒
- B. Certification
- C. Promotion
- D. Verification

Answer: A**Question: 99****Deep Dumps**

Using existing baseline Data Manager policies, what condition must a CI meet before it can be archived or deleted?

- A. Be fully operational and in use
- B. Be marked as critical
- C. Be retired and in end of life ☒
- D. Be marked as inactive

Answer: C**Question: 100****Deep Dumps**

The Configuration Management team wants to confirm that all servers in the CMDB actually exist in the data center.

Which CMDB Data Manager policy type would the team create?

- A. Attestation ☒
- B. Retire
- C. Delete
- D. Archive
- E. Certification

Answer: A**Question: 101****Deep Dumps**

DRAG DROP

-

Drag and drop the CMDB Health Dashboard metric to the description.

Answer Area

Audit

Duplicate

Orphan

Recommended

Required

Stale

CMDB records that represent the same physical or logical asset multiple times

Fields necessary to create or update a CI record in the CMDB

CMDB records that no longer maintain their logical or physical relationships with other CIs

CMDB records that are no longer actively updated, but remain stored in the database

Fields that support the accuracy, completeness, and usability of CI records in the CMDB

Actual values of specified fields are compared to the expected values defined in a template

Answer:

Question: 103

Deep Dumps

How do CMDB management tools and features within the CMDB governance pillar help organizations manage CIs and improve service delivery? (Choose two.)

A. Reduced hardware costs

- B. Gain visibility and control 🐼
- C. Assist integration choices
- D. Enhanced Service Management operations 🐼

Answer: BD

Question: 104

Deep **Dumps**

What types of policies can be created within CMDB Data Manager? (Choose two.)

- A. Retire 🐼
- B. Reconciliation
- C. De-duplication 🐼
- D. Archive 🐼❤️

Answer: AD

Question: 105

Deep **Dumps**

Which default user groups are available when setting up a CMDB Data Manager policy and specifying the task assignment with the Assignment type set to 'User Group Field'? (Choose two.)

- A. Owned by Group
- B. Assignment Group
- C. Managed By Group 🐼
- D. Support Group 🐼

Answer: BD

Question: 106

Deep **Dumps**

During a CMDB implementation, a team member is tasked with ensuring the accuracy and completeness of CI data. This person is also responsible for maintaining data quality and resolving discrepancies.

Which role is responsible for these tasks?

- A. CMDB Architect
- B. IT Asset Manager
- C. Configuration Manager 🐼
- D. Service Owner

Answer: C

Question: 107

Deep **Dumps**

A CMDB Configuration Manager sets up the following data filter for a certification policy using CMDB Data Manager.

•Table: Server [cmdb_ci_server]
•Filter: Operating System | contains | Server OR Operating System | contains | Linux

Which operating systems are affected by this policy? (Choose two.)

- A. Linux CentOS ☒
- B. AIX
- C. Windows Server 2022 Datacenter ☒
- D. Windows 2019 Datacenter

Answer: AC

Question: 108

Deep Dumps

A CMDB Administrator needs to track which CIs and CI classes are missing key data.

Which CMDB Health Dashboard scorecard supports tracking this requirement?

- A. Correctness
- B. Completeness ☒
- C. Compliance

Answer: B

Question: 109

Deep Dumps

A CMDB Administrator has a number of similar de-duplication tasks that need to be remediated in bulk.

How does the Administrator achieve this?

- A. Utilize the Duplicate CI Remediator Wizard
- B. Configure and run a custom de-duplication background script
- C. Create de-duplication tasks manually and remediate each
- D. Create and run a de-duplication template ☒

Answer: D

Question: 110

Deep Dumps

A CMDB Administrator group aims to establish a process for receiving task notifications when the Support Group or Managed By Group fields are not populated for operational Linux servers stored in the CMDB.

Which ServiceNow modules can be leveraged to configure recommended fields and generate task records in cases where these fields are missing for Linux servers in the CMDB?

- A. CMDB Workspace and Scheduled Jobs
- B. Technical Service Offerings and Dynamic CI groups
- C. Dynamic CI groups and CMDB groups
- D. CI Class Manager and Health Preferences ☒

Answer: D

Question: 111

Deep Dumps

A CMDB Administrator has a report in ServiceNow that lists all CMDB Services that do not have an owner and wants to use a ServiceNow Playbook.

What Governance process play can prevent this from recurring?

- A. Set a default value on the Service Owner field so that is never empty
- B. Make the field Owned by mandatory ☒
- C. Make the field Managed by mandatory on all CIs

Answer: B

Question: 112

Deep Dumps

A CMDB Administrator wants to leverage the Staleness metric from the CMDB Health Dashboard - Correctness Scorecard.

What is the default duration of this metric?

- A. 30 days ☒
- B. 24 hours
- C. 7 days
- D. 60 days

Answer: A

Question: 113

Deep Dumps

A Configuration Manager responsible for a specific region wants to use the CMDB Health Dashboard to improve the data quality of the CMDB for that region. The Configuration Manager only sees the overall score and grouped by CI Class.

How can the Configuration Manager get a score for regionally relevant CIs?

- A. On the CMDB health settings, activate the option, Group scores by region
- B. Customize the CMDB Health Dashboard scheduled jobs to group the results by region
- C. Create CMDB groups with type, health, by region ☒

Answer: C

Question: 114

Deep Dumps

How does a CMDB Administrator use the ServiceNow Platform to ensure the data quality associated with CIs in the CMDB?

- A. Data Quality Scheduled Job

- B. CMDB Audit Business Rule
- C. CMDB Workspace 
- D. Data Quality Business Rule

Answer: D

Question: 115

Deep Dumps

A CMDB Configuration Manager is reviewing the metrics on the CMDB Health Dashboard's Correctness Scorecard. For the Duplicate metric in the Server class, it shows Healthy CIs/Evaluated as 59,000/60,000.

What does this indicate about the scope of server records calculated under this metric?

- A. 1,000 server records are in scope for this metric
- B. 60,000 server records are in scope for this metric
- C. 59,000 Linux and 60,000 Windows servers records are in scope for this metric
- D. 59,000 server records are in scope for this metric

Answer: B

Question: 116

Deep Dumps

A CMDB Administrator wants to start utilizing the CMDB Health Dashboard and its Key Performance Indicators.

What does the Administrator do to start using the dashboard?

- A. Download the dashboard from the ServiceNow store
- B. Nothing, the dashboard is activated by default
- C. Activate the dashboard scheduled jobs
- D. Activate the dashboard system property

Answer: C

Question: 117

Deep Dumps

Which are CMDB Data Manager end of life policy types? (Choose two.)

- A. Archive 
- B. Retire 
- C. Lost
- D. Decommission
- E. Disposed

Answer: DE

Question: 118

Deep Dumps

A CMDB team has noticed that some hardware CIs are missing the serial number information, making it difficult to maintain data accuracy. The team needs a structured approach to identify and address these gaps.

Which accomplishes this task?

- A. CI Class Manager
- B. Service Graph Connectors
- C. CMDB Data Foundation Playbook 

Answer: C

Question: 119

Deep Dumps

A CMDB Configuration Manager intends to implement CMDB Data Manager delete and archive policies for all server records in the New York datacenter.

In which lifecycle state would servers be affected by these new policies?

- A. Missing - Stolen
- B. Inventory - Available
- C. End of Life - Retired 
- D. In any lifecycle state

Answer: C

Question: 120

Deep Dumps

The CMDB Administrator has been asked to establish Configuration Management with a functional CMDB.

Which factor is most critical for successfully operationalizing the CMDB in ServiceNow?

- A. Populating the CMDB with as much data as possible to ensure a comprehensive inventory of CIs
-  B. Establishing clear governance and continuously monitoring CMDB health
- C. Allowing IT teams to modify CMDB records as needed to promote flexibility in data management
- D. Relying on automated discovery tools to maintain and update CMDB records

Answer: B

Question: 121

Deep Dumps

Where does a user with the appropriate role(s) review and manage the generated tasks after configuring CMDB Data Manager policies?

- A. CMDB Health Dashboard > Duplicate CIs tab
- B. CMDB Workspace > My Work tab 
- C. CMDB Health Dashboard > Audit tab
- D. CMDB Workspace > Management tab

Answer: D

Question: 122**Deep Dumps**

A Configuration Management Process Owner needs to configure Data Manager for policy tasks to be correctly assigned and aligned with the group attribute assigned to a class in CI Class Manager.

Which is the recommended field to be used for a policy task assignment?

- A. Managed by group ☒
- B. Change group
- C. Approval group
- D. Support group

Answer: A**Question: 123****Deep Dumps**

A CMDB Administrator uses the CMDB Data Foundations Dashboard to gain insights into the CMDB. The results display low scores for several metrics.

Which actions can the CMDB Administrator take to improve the CMDB Health? (Choose two.)

- A. Remove non-operational and retired CIs
- B. Focus on metric(s) with Critical and High priorities ☒
- C. Adjust the metrics using exclusion rules to improve the scores
- D. Use the Remediation Playbooks linked beside each metric ☒

Answer: BD**Question: 124****Deep Dumps**

Which shows the most complete list of policy types that are provided by the CMDB Data Manager?

- A. Delete, Attestation, Retire, and Certification
- B. Attestation, Retire, and Certification
- C. Archive and Delete
- D. Retire, Archive, Attestation, Certification, and Delete ☒

Answer: D**Question: 125****Deep Dumps**

The CMDB Administrator group seeks to filter specific CI classes that display on the CMDB Health Dashboard. This ensures that only relevant data is displayed, excluding items that are not ready for management.

Which feature can the group utilize to achieve this goal?

- A. Reconciliation Rules
- B. Identification Rules
- C. Data Refresh Rules

Answer: D

Question: 126

Deep Dumps

A CMDB Administrator is using the Duplicate CI Remediator to address a de-duplication task. On the first tab of the wizard, the Main CI is selected.

Which attributes are used to identify the Main CI? (Choose two.)

- A. Least Related Items
- B. Most Related Items
- C. Newest Created
- D. Oldest Created

Answer: BD

Question: 127

Deep Dumps

A Configuration Manager needs to enable a CMDB Data Manager policy to remove records from a CI Class while retaining the ability to restore them within a specified period.

Which policy type should the Configuration Manager create?

- A. Archive
- B. Retire
- C. Certification
- D. Delete

Answer: A

Question: 128

Deep Dumps

DRAG DROP -

A manufacturing organization has implemented Incident Management in ServiceNow and wants to integrate additional products to enhance its functionality.

Drag each ServiceNow product to the value it brings to supporting Incident Management.

	Answer Area	
Discovery		Delivers asset actions and events for the management and maintenance of assets during incidents
Hardware Asset Management		Supplies critical IT and financial risk data, enabling the team to assess the broader impact of incidents on business operations
Risk Management		Offers detailed operational-level data on hardware and application to improve incident resolution
Service Portfolio Management		Provides life cycle information about services, helping to align incidents with the status and history of services

Answer:

Discovery

Hardware Asset Management

Risk Management

Service Portfolio Management

Answer Area

Delivers asset actions and events for the management and maintenance of assets during incidents

Supplies critical IT and financial risk data, enabling the team to assess the broader impact of incidents on business operations

Offers detailed operational-level data on hardware and application to improve incident resolution

Provides life cycle information about services, helping to align incidents with the status and history of services

Question: 129

Deep Dumps

Where can a CMDB 360/Multisource CMDB Saved Query be viewed and created in the CMDB Workspace?

- A. Saved queries window on the Insight tab
- B. CMDB Query Builder
- C. Coverage window on the CMDB 360 tab
- D. Saved queries window on the CMDB 360 tab

Answer: D

Question: 130

Deep Dumps

An organization is changing data centers and needs to know the consequences of the planned changes. How can Application Service mapping be used as part of Change Management?

- A. To understand the physical location of CIs
- B. To identify which devices will go offline first
- C. To understand the business impact of CIs

Answer: C

Question: 131

Deep Dumps

Where can an administrator perform Natural Language Queries (NLQ)?

- A. CMDB Data Manager
- B. CI Class Manager
- C. CMDB Workspace
- D. CMDB Health Dashboard

Answer: C

Question: 132

Deep Dumps

A healthcare provider faces a critical incident affecting its patient management system. The provider needs to determine the users impacted to mitigate disruption effectively. Which CSDM-related data should they leverage?

- A. Incident history of similar CIs
- B. Application Service environment attribute
- C. Service Offerings by Department or Location 
- D. Affected CI [task_ci] related list

Answer: C

Question: 133

Deep **Dumps**

A Configuration Manager wants to use the Unified Map. Where would it be accessed?

- A. CMDB Data Manager
- B. CI Class Manager
- C. CMDB Workspace 

Answer: C

Question: 134

Deep **Dumps**

A service owner is using Unified Map to understand the composition of a service but wants to filter out irrelevant information.

Which options are available to the service owner from the filter panel? (Choose two.)

- A. Discovery source  
- B. CI type  
- C. Business critically
- D. Managed by group

Answer: BC

Question: 135

Deep **Dumps**

A CMDB Administrator wants to create a CMDB query to find all databases located in Seattle that are connected to application services. They also want to include incidents related to those databases.

Which actions does the company take to build this query? (Choose two.)

- A. Add to the canvas the Incident table from the Non-CMDB Tables list 
- B. Add a filter to the database node for location=Seattle 
- C. Set the relationship level to 'Up to 2nd level relationships'
- D. Add property columns to the application service node

Answer: AB

Question: 136

Deep **Dumps**

The Configuration Management team finds value in the reports from CMDB 360/Multisource CMDB and wants to use it for all CI data.

Which must be true in order for CMDB 360/Multisource CMDB to be able to report on and analyze that data?

- A. Reconciliation rules with priorities must be configured.
- B. The CI data must be from an authorized Service Graph Connector.
- C. The CI data must go through the IRE. 
- D. ServiceNow Discovery must be used to populate the CI data.

Answer: C

Question: 137

Deep Dumps

ServiceNow Event Management significantly benefits from a well-maintained and properly populated CMDB.

What are key advantages it provides to Event Management? (Choose two.)

- A. Correlation of alerts to knowledge base articles
- ☒ B. Mapped services provide visibility to the business impact of an alert
- ☒ C. Binding of alerts to specific CIs
- D. Mapped services provide visibility to users consuming the service

Answer: BC

Question: 138

Deep Dumps

A CMDB Administrator needs insights into how their CMDB is configured according to ServiceNow recommended practice.

Which should be used?

- A. CMDB Health Dashboard
- B. CMDB Workspace
- C. CMDB Data Manager
- D. CMDB Data Foundation Dashboard 

Answer: D

Question: 139

Deep Dumps

What is the value of using the CMDB in security operations? (Choose two.)

- A. Auto-resolves a vulnerability
- B. Identifies the IT infrastructure with a vulnerability 
- C. Enables audits and attestations across CIs
- D. Allows security team to assess and remediate an incident 

Answer: BD

Question: 140**Deep Dumps**

The CMDB Configuration Management team has successfully developed a healthy and trusted CMDB. They have integrated discovered infrastructure data, accurately referenced non-discoverable data (such as change and support group information), and made the CMDB service-aware using Service Mapping.

How will these improvements enhance the change management process? (Choose two.)

- A. Provides insight into the potential impact of the change
- B. Ensures that no changes result in service downtime, regardless of planning or execution
- C. Automatically schedules and deploys changes without human review or approval
- D. Enables auto population of the assignment group field to dynamically route changes

Answer: AD**Question: 141****Deep Dumps**

A CMDB Manager uses CMDB 360/Multisource CMDB to maintain and improve CMDB quality.

Why would the Manager use CMDB 360/Multisource CMDB?

- A. To identify CI attributes from multiple data sources
- B. To ingest data from multiple data sources using Import Set(s)
- C. To populate the CMDB from multiple data sources
- D. To ingest data from multiple data sources using Service Graph Connector(s)

Answer: A**Question: 142****Deep Dumps**

A CMDB Administrator is comparing the Unified Map to the Service Mapping map.

What are additional capabilities of the Unified Map? (Choose two.)

- A. Number of levels displayed on a map can be modified
- B. Visibility to an application and the host it is installed on
- C. Map nodes can be filtered based on user preferences
- D. Map can be zoomed in and out

Answer: AC**Question: 143****Deep Dumps**

A Service Desk Manager wants to leverage the Unified Map to find active incidents or problems for a selected CI.

Which panel will give the manager visibility and details?

- A. Overview
- B. Attributes
- C. Related items
- D. Application services

Answer: C

Question: 144

Deep Dumps

A CMDB Administrator wants to educate the team on the various actions that can be performed within the CMDB Workspace.

What actions can be initiated from the CMDB Workspace? (Choose two.)

- A. Create a new CMDB class
- B. Execute ServiceNow Discovery ☒
- C. Remediate duplicate CI records ☒
- D. Create a CMDB Data Manager certification policy

Answer: BC

Question: 145

Deep Dumps

A CMDB Administrator knows that the CMDB Data Foundation Dashboard is a resource to monitor and improve data quality.

What is a benefit of this dashboard?

- A. Provides the ability to resolve certification policy tasks
- B. Provides the ability to configure health-related metrics
- C. Provides key health-related metrics to make decisions ☒

Answer: C

Question: 146

Deep Dumps

A CMDB Administrator is asked to create a query using the CMDB Query Builder that displays all operational CIs belonging to a specific application service.

Which steps provide the desired outcome?

- A. 1. Add the Business Application, Application Service, and Configuration Item classes to the canvas.
2. Define a filter for the application service name and the operational status of the configuration items.
3. Configure the relationship between the classes.
4. Run the query.
- B. 1. Add the Application Service and Configuration Item classes to the canvas.
2. Configure the relationship between the classes.
3. Define a filter for the application service name and the operational status of the configuration items.
4. Run the query. ☒
- C. 1. Add the Application Service and Configuration Item classes to the canvas.
2. Configure the relationship between the classes.
3. Add the Operational Status and Name fields as columns.
4. Run the query.

Answer: B

Question: 147**Deep Dumps**

A Configuration Manager wants to explore ServiceNow CMDB 360 saved queries to see if the reports can assist with managing of CMDB data.

What insights are gained from CMDB 360 queries? (Choose two.)

- A. Gaps in attribute data from different data sources 
- B. Unique CIs created from different data sources
- C. Different attribute values from different data sources 
- D. Orphan CIs created from different data sources
- E. Duplicate configuration items from different data sources

Answer: AC**Question: 148****Deep Dumps**

A CMDB Administrator wants to leverage the CMDB Data Foundations Dashboard.

What are benefits of using this application?

- A. Checks that important data is valid and properly configured 
- B. Has a framework to create custom metrics for the CMDB
- C. Provides playbooks to assist in the remediation of potential risks 
- D. Uses automation to remediate potential risks

Answer: AC**Question: 149****Deep Dumps**

A Service Owner needs to view related items, such as Active Incidents and Planned Changes, directly on the home node of the Unified Map.

Which work area would allow the Service Owner to meet this goal?

- A. Map
- B. Tool box
- C. Content controls
- D. Contextual side panel 

Answer: D**Question: 150****Deep Dumps**

A CMDB Administrator wants to use the CMDB and CSDM Data Foundations Dashboard.

Where can the Administrator obtain the dashboard?

- A. It is a free application on the ServiceNow Innovation Lab.

- B. It is active by default.
- C. It is a free application on the ServiceNow Store. 
- D. It is a paid application on the ServiceNow Store.

Answer: C

Question: 151

Deep **Dumps**

A Configuration Manager working in the CMDB Workspace wants to see how CIs are connected to each other.

Which tool can be used?

- A. Relationship Map
- B. Business Service Map
- C. Unified Map 

Answer: C

Question: 152

Deep **Dumps**

An organization is using CMDB Query Builder to find all application services with a database that has incidents and all infrastructure in those application services.

Which steps does the organization take to build this query? (Choose two.)

- A. Use a CMDB Query to include application services and their related infrastructure 
- B. Use a Service Mapping Query to find all incidents related to the database
- C. Use a Service Mapping Query to include non-CMDB tables like the Incident table
- D. Add a non-CMDB table to the query 

Answer: AD

Question: 153

Deep **Dumps**

In a company there is a need to understand the CSDM maturity level needed. Different stakeholders listed a number of use cases that they expect over time.

Which use case requires information objects?

- A. The Event Operations team wants to automate their events into incident for operational actions.
- B. The Business Service Management team wants to understand the operational impact for their consumer parties.
- C. The Customer Service team wants to onboard pro-active case management.
-   D. The SecOps team wants to understand the operational risk in the Business Application context.
- E. The Asset Management wants to understand to asset life cycle compliancy in a Business Application context.

Answer: B

Question: 154**Deep Dumps**

A Platform Owner is collaborating with stakeholders in the manufacturing industry to align their CIs with the CSDM 5 framework. They need to map production line monitoring systems to the appropriate CSDM domain. Which CSDM 5 domain does the Platform Owner use?

- A. Build and Integration (Build)
- B. Service Delivery (Manage Technical) 
- C. Service Consumption (Sell/Consume)
- D. Design and Planning (Design)
- E. Foundation

Answer: B**Question: 155****Deep Dumps**

A development team is working on a project and an application will be deployed to many servers. There will be several security requirements that must be checked to adhere to lawful compliance because the application will be holding customer personal data (PII and PCI).

Where in the CSDM does the development team look to store the information that will be used to satisfy the audits?

- A. Technology Management Service Offerings (Technical Service Offerings) and Dynamic CI Groups
- B. Business Applications and Information Objects 
- C. Customer Service Offerings and Databases

Answer: B**Question: 156****Deep Dumps**

A customer's CMDB is aligned to the CSDM Walk stage. What benefit is provided by the CMDB?

- A. Enables impact assessments for incident, problem, and change on Business Services 
- B. Improves the implementation velocity of APM Foundation for future business application rationalization
- C. Allows for additional stratification of Technical team's support structure along the lines of OLAs and commitments

Answer: A**Question: 157****Deep Dumps**

A CMDB Administrator wants to improve data quality related to the CSDM. Which action should the Administrator take to meet this goal?

- A. Use the default configured CMDB Health Dashboard
- B. Start the ServiceNow Health Scan
- C. Use the CSDM Data Foundation Dashboard 

Answer: C

Question: 158**Deep Dumps**

According to the Common Service Data Model (CSDM), a server team is requesting a catalog item be created for infrastructure upgrade requests. Which role is involved in initiating the request and defining requirements?

- A. Enterprise Architecture
- B. Technology Service Owners 
- C. Application Service Owners

Answer: B**Question: 159****Deep Dumps**

A CMDB Administrator is evaluating whether to monitor the metrics provided on the CMDB Foundation Dashboard. Which benefits support the decision to continually monitor the results on this dashboard? (Choose two.)

- A. Provides a list of all CIs that failed health audits
- B. Provides metrics for CIs Processed by the IRE 
- C. Provides metrics on active CIs updated in the last 90 days 
- D. Reports on all orphan CIs in the CMDB

Answer: BC**Question: 160****Deep Dumps**

The Configuration Manager is preparing the justification to utilize the CMDB Data Foundations Dashboard. Which benefits align with the usage of this dashboard? (Choose two.)

- A. It enables monitoring and tracking of CMDB health over time. 
- B. It provides actionable insights to improve data quality and completeness. 
- C. It helps detect and eliminate duplicate records in the CMDB.
- D. It automates the approval process for change management.

Answer: AB**Question: 161****Deep Dumps**

A Change Manager wants to gain value from CSDM. How will the Change Management process benefit from CSDM? (Choose two.)

- A. Identify blackout windows for the change
- B. Determine the root cause of the change issue
- C. Understand the impact of the change on services  
- D. Route the change dynamically  

Answer: AC

Question: 162**Deep Dumps**

Which are business values of CMDB? (Choose two.)

- A. Collecting and managing financial data
- B. Streaming incident and change management 
- C. Strengthening operational resiliency 
- D. Automating maintenance for CI relationships

Answer: BC**Question: 163****Deep Dumps**

A CMDB Administrator is implementing a Vulnerability Response or Security Incident Response and needs to ensure customers have enough context to estimate risk and set task priorities.

Which Get Well Playbook from the CSDM Data Foundation Dashboard helps with this?

- A. Locations without a Parent Location
- B. Named Product Models without Product Owners
- C. Percentage of Custom Status Values for CI Life Cycle Stages
- D. Application Services with Business Application Relationships 

Answer: D**Question: 164****Deep Dumps**

A CMDB Administrator wants to run the Services Have Owners Identified playbook to remediate the issues shown in the CMDB Data Foundations Dashboard.

Which remediation plays would be used? (Choose two.)

- A. Govern Data  
- B. Fix Data  
- C. Report Data
- D. Analyze Data

Answer: BD**Question: 165****Deep Dumps**

A Configuration Management Governance team is transitioning from utilizing legacy CMDB status fields to CSDM life cycle status fields.

Which table can be modified?

- A. Life Cycle Stages [life_cycle_stage]
- B. Life Cycle Mapping [life_cycle_mapping] 
- C. Life Cycle Controls [life_cycle_control]
- D. Life Cycle Stage Status [life_cycle_stage_status]

Answer: B

Question: 166

Deep Dumps

A CMDB Administrator, viewing the CMDB Data Foundations Dashboard, notices the Unique Locations Result percentage low.

What is the recommended process from the associated playbook to correct this issue?

- A. Review both locations, update CIs with the correct location and delete the duplicate location
- B. Retain the location that matches the organization's standard naming convention, and delete the duplicate without further validation
- C. Keep both locations as either can be used as a valid alternate location
- D. Use the Duplicate CI Remediator to merge the duplicate location records

Answer: A

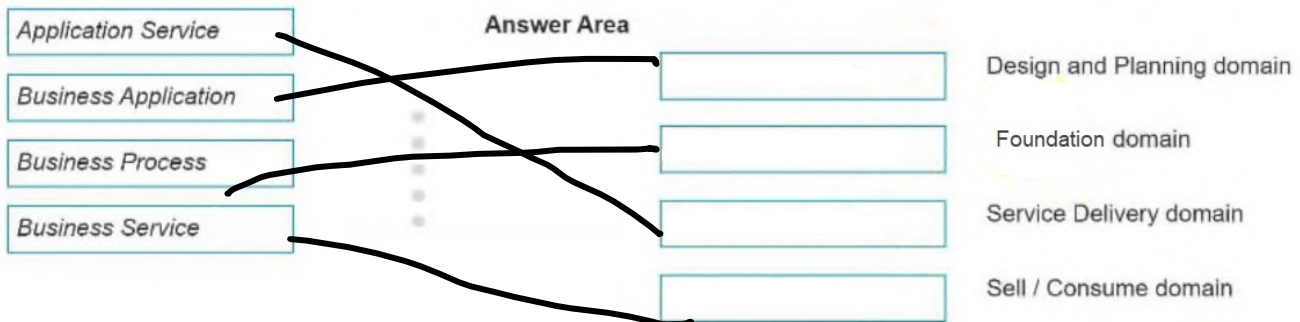

Question: 167

Deep Dumps

DRAG DROP -

A CMDB Owner starts on the CSDM journey and needs to become familiar with the CSDM domains.

Drag the CMDB objects to the correct CSDM domains.

Answer:

Question: 168

Deep Dumps

A Configuration Manager is planning the implementation of the CMDB.

Which is the prescribed CSDM rollout order?

- A. Architecture, Business, Technical, Governance
- B. Initiate, Plan, Execute, Deliver, Close
- C. Foundation, Crawl, Walk, Run, Fly
- D. Initial, Developing, Defined, Managed

Answer: C

Question: 169**Deep Dumps**

A customer wants to model their business applications and would like to capture different types of data that includes Personally Identifiable Information (PII) data.

Based on these requirements, which CMDB class needs to be leveraged to achieve this?

- A. API Component
- B. Information Object 
- C. Business Capability
- D. Data Classification

Answer: B**Question: 170****Deep Dumps**

A CSDM Data Manager needs metrics on the alignment of product models, locations, and business units with best practices.

Which tab in the CSDM Data Foundations Dashboard provides this information?

- A. Fly
- B. Crawl
- C. Foundation 
- D. Run
- E. Walk

Answer: C**Question: 171****Deep Dumps**

A Service Portfolio Manager wants to know what Application Services their Business Service Offerings depend on.

What stage of CSDM would map this relationship?

- A. Foundation
- B. Fly
- C. Run
- D. Walk 
- E. Crawl

Answer: D**Question: 172****Deep Dumps**

An Enterprise Architect of a financial services company is working across the enterprise and wants to track their capabilities.

Which CSDM 5 domain is used?

- A. Build and Integration (Build)

- B. Design and Planning (Design) 
- C. Service Delivery (Manage Technical)
- D. Service Consumption (Sell/Consume)
- E. Foundation

Answer: B

Question: 173

Deep Dumps

DRAG DROP

-

Given a list of Service types in the platform. Drag the appropriate service to its definition.

	Answer Area	
Application Service		Logical representation of a deploy system or application stack.
Business Service		Published to Service Owners and underpins one or more business or application Services.
Technology Management Service (Technical Service)		Published to Business Users and underpins one or more business capabilities.

Answer:

	Answer Area	
Application Service		Logical representation of a deploy system or application stack.
Business Service		Published to Service Owners and underpins one or more business or application Services.
Technology Management Service (Technical Service)		Published to Business Users and underpins one or more business capabilities.

Question: 174

Deep Dumps

DRAG DROP

-

A Platform Owner is building the governance team to support the CSDM.

Drag the domain to the roles that make up the governance team.

Answer Area

Design Domain		Service Owner(s), Platform Owner
Foundation Domain		Technology Service Owner(s), Application Service Owner(s), Platform Owner
Portfolio Domain		Enterprise Architect(s), Platform Owner
Technical Domain		Enterprise Architect(s), Data Steward(s), Process Owner(s), Platform Owner

Answer:

Answer Area

Design Domain		Service Owner(s), Platform Owner
Foundation Domain		Technology Service Owner(s), Application Service Owner(s), Platform Owner
Portfolio Domain		Enterprise Architect(s), Platform Owner
Technical Domain		Enterprise Architect(s), Data Steward(s), Process Owner(s), Platform Owner

Question: 175

Deep Dumps

DRAG DROP

An Enterprise Architect needs to help the CMDB owner understand the benefits of CSDM.

Drag the CSDM domains to the respective benefits.

Answer Area

Foundation		Understand CIs related to business application and related capabilities to identify redundancies, monitor costs and make better investment decisions around roadmap
Design and Planning		Understand technical services, technical service offerings, service support and all relationships to underlying technology CIs
Service Consumption		Understand business services and ownership, cost, scope of what is offered to the business/consumer and request access to the business services
Service Delivery		Use the base system tables when implementing the CSDM to derive the highest value from ServiceNow products and the Now Platform

Answer:

Answer Area

Foundation

Design and Planning

Service Consumption

Service Delivery

Understand CIs related to business application and related capabilities to identify redundancies, monitor costs and make better investment decisions around roadmap

Understand technical services, technical service offerings, service support and all relationships to underlying technology CIs

Understand business services and ownership, cost, scope of what is offered to the business/consumer and request access to the business services

Use the base system tables when implementing the CSDM to derive the highest value from ServiceNow products and the Now Platform

Question: 176

Deep Dumps

A health organization must track certain data (for example, regulated patient information) and its relation to Business Applications.

Which action does CSDM recommend to meet this goal?

- A. Create fields on the Business Application record to mark the Business Application as containing patient information, and then ask the Business Application owner to mark the application as having patient information or not.
- B. Work with the Database administration team to classify the data on each database that holds patient information, and then use Relationships to map that back to the Business Application.
- C. Create an information Object to represent the patient information, and then link it through a relationship to the Business Application after consulting with the Application owner. ●

Answer: C

Question: 177

Deep Dumps

A CMDB Architect intends to populate the CMDB using the CSDM guidance.

Which key stakeholders from the organization should be involved in decisions regarding population of the CMDB using the CSDM Crawl Stage?

- A. Business Service Manager, Technology Service Owner ●
- B. Application Owner, Application Service Owner
- C. Customer Service Manager, Infrastructure Manager

Answer: B

Question: 178

Deep Dumps

A hospital has received a new CT Scanner. The inventory management team has created a catalog item doctors can use to schedule patients for scans.

What CSDM domain should the inventory management team map the catalog item to?

- A. Foundation
- B. Design and Planning (Design)
- C. Service Delivery (Manage Technical Service)
- D. Service Consumption (Sell/Consume) ●

Answer: D

Question: 179

Deep Dumps

A CSDM Data Manager needs metrics on the alignment of Technology Management Services (Technical Services) and Technology Management Offerings (Technical Service Offerings) with best practices.

Which tab in the CSDM Data Foundation Dashboard provides this information?

- A. Crawl
- B. Run
- C. Walk
- D. Fly

Answer: B

Question: 180

Deep Dumps

A CMDB Architect intends to build a CMDB using CSDM guidance.

Which CMDB tables will the architect use to build the CSDM sell/consume domain?

- A. Business Capability, Information Object, Business Application
- B. Business Service Offering, Business Service
- C. Application Service, Technology Management Service (Technical Service), Technology Management Offering (Technical Service Offering)

Answer: B

Question: 181

Deep Dumps

The Application Portfolio Management team is asking for help modeling platforms as Business Applications.

How would this be mapped in CSDM using the ServiceNow Platform in the Incident and Change applications?

- A. ServiceNow Platform, Incident, and Change would all be web based Architecture type. Incident and Change would have a reference to ServiceNow Platform.
- B. ServiceNow Platform would be an Architecture type of Platform Host. Incident and Change would be Platform Applications and have a reference to ServiceNow Platform.
- C. ServiceNow Platform, Incident, and Change would all be web based Architecture type. A Depends On relationship would be created between ServiceNow Platform and Incident and Change.
- D. ServiceNow Platform would be an Architecture type of Platform Host. Incident and Change would be Platform Applications. Then a Depends On relationship would be created between ServiceNow Platform and Incident and Change.

Answer: B

Question: 182**Deep Dumps**

A Manager needs information on how to correctly establish relationships between Infrastructure CIs, Technology Management Offerings (Technical Service Offerings), and Application Services within the CMDB.

Which CSDM domain would provide this information?

- A. Design and Planning (Design)
- B. Service Consumption (Sell / Consume)
- C. Service Delivery (Manage Technical Services) 
- D. Build and Integration (Build)
- E. Foundation

Answer: C**Question: 183****Deep Dumps**

A retail organization needs to ensure that incidents affecting customer-facing services are resolved quickly to reduce potential revenue loss.

Which CSDM attribute is used to prioritize these services?

- A. Assignment Group on the CI record
- B. Affected CIs in the Incident record
- C. Business Criticality in the Service Offering 
- D. Service classification in the Technical Service

Answer: C**Question: 184****Deep Dumps**

A CMDB Manager wants to start adding CSDM design and planning (design) domain components into the CMDB.

Who is involved in this exercise? (Choose two.)

- A. Application Service Owner
- B. Enterprise Architect 
- C. Business Relationship Manager
- D. Application Owner 

Answer: BC**Question: 185****Deep Dumps**

A company wants to track regulatory compliance. ServiceNow has an artifact type called an information object as part of the CSDM framework.

What is the purpose of an information object?

- A. It describes data in general on a group of Configuration Items.
- B. It describes data exchanged between an API interface and an Application.

C. It describes the logical data to the Business Applications. ❤️

Answer: C

Question: 186

Deep Dumps

The ITSM Manager wants to use Technology Management Offerings (Technical Service Offerings) to populate the support group of associated CIs.

What CSDM stage would this be completed in?

- A. Run 📌
- B. Walk
- C. Foundation
- D. Fly
- E. Crawl

Answer: A

Question: 187

Deep Dumps

A Configuration Manager is implementing end to end service modeling and wants to get help on status and playbooks for improving the quality.

What does the Configuration Manager reference to obtain guidance?

- A. CMDB Data Foundation Dashboard
- B. Service Mapping Data Foundation Dashboard
- C. CSDM Data Foundation Dashboard 📌
- D. CMDB Workspace

Answer: C

Question: 188

Deep Dumps

A CMDB Administrator is leveraging CI data as part of an Integrated Risk Management implementation and the Entity Scoping process. The Administrator wants to leverage the CSDM Data Foundations Dashboard playbooks under the Run tab.

Which CSDM relationships are leveraged using the CSDM playbooks? (Choose two.)

- A. Business Applications that have their relationships to Information Objects
- B. Business Applications that have relationships to Application Services
- C. Logical CIs that have relationships with Information Objects
- D. Locations that have established parent records

Answer: AB

Question: 189**Deep Dumps**

The Incident Process Owner asks which classes of CSDM are used on the Incident form.

Which classes are appropriate? (Choose two.)

- A. Application Service 
- B. Service Offering 
- C. Business Application
- D. Service Portfolio

Answer: AB**Question: 190****Deep Dumps**

A Business Relationship Manager in an organization wants to implement Service Portfolio Management (SPM) and to present offerings to business consumers.

Which CSDM Domain does this align with?

- A. Design and Planning (Design)
- B. Service Consumption (Sell/Consume) 
- C. Service Delivery
- D. Build and Integration (Build)

Answer: B**Question: 191****Deep Dumps**

How is the CMDB aligned to business processes? (Choose two.)

- A. Enables the CFO/CIO to track software licenses
- B. Enhances decision-making and operational efficiency across the organization 
- C. Extends service delivery management to all enterprise departments
- D. Provides a centralized view of configuration items and their relationships 

Answer: BD**Question: 192****Deep Dumps**

Choose 2 option. A Configuration Manager wants to explore ServiceNow CMDB 360 saved queries to see if the reports can assist with managing of CMDB data. What insights are gained from CMDB 360 queries?

- A. Duplicate configuration items from different data sources
- B. Orphan CIs created from different data sources
- C. Gaps in attribute data from different data sources
- D. Different attribute values from different data sources
- E. Unique CIs created from different data sources

Answer: C,D

Question: 193

Deep Dumps

Choose 2 option. A ServiceNow Administrator wants to implement Service Graph Connectors to provide integrations to many third-party solutions that the company wants integrated into the CMDB. Which categories of connectors are available to the Administrator?

- A. Workflow Automation
- B. Observability
- C. DevOps
- D. Cloud

Answer: B,D

Question: 194

Deep Dumps

Choose 2 option. A global enterprise integrates data from multiple discovery sources such as ServiceNow Discovery, SCCM, AWS, and manual uploads to populate its CMDB. However, each discovery source categorizes the same CIs differently, leading to duplicate records and inconsistencies across the system. As a result, the CMDB team is struggling with data accuracy and standardization. What actions does the CMDB team take to resolve the issue?

- A. A. Implement and use identification and reconciliation rules to avoid duplicates and standardize CI classification.
- B. B. Allow each discovery source to define its own CI class, even if it results in inconsistencies.
- C. C. Use CI Class Manager to establish standardized CI classes and attributes across all discovery sources.
- D. D. Create a custom script to manually adjust incoming data before storing it in the CMDB.

Answer: AC

Question: 195

Deep Dumps

A CMDB CI Class Owner responsible for the Windows Servers needs to manage the Windows Server class. Which CI Class Manager feature will help the CI Class Owner streamline this task?

- A. CI Favorites
- B. Pinned Classes
- C. Search CI Classes

Answer: B

Question: 196

Deep Dumps

A CMDB Administrator is working in the CI Class Manager on the Basic Info tab. How can the class be set as a Principal Class?

- A. Select 'Yes' from the Principal Class choice list
- B. Check the Principal Class check box

C. Click the Principal Class UI Action button

Answer: B

Question: 197

Deep Dumps

A CMDB Administrator is using the Duplicate CI Remediator to address a de-duplication task. On the first tab of the wizard, the Main CI is selected. Which attributes are used to identify the Main CI?

- A. Least Related Items
- B. Most Related Items
- C. Newest Created
- D. Oldest Created

Answer: B

Question: 198

Deep Dumps

A CMDB Administrator needs to configure a new application identification rule that considers the potential for the same application installed more than once on the same server. Which is the best choice of a criterion attribute?

- A. Configuration File Name
- B. Version
- C. Class
- D. Configuration File Path
- E. Port

Answer: D

Question: 199

Deep Dumps

A CMDB Administrator has installed a Service Graph Connector (SGC), and then made customizations to the mappings. Which is a consequence of this action?

- A. The customized mappings are not supported by ServiceNow, and the customer is responsible for supporting their own customized SGC.
- B. Fields populated by a customization will have a special tag associated with them in the CMDB.
- C. The customization will prevent the SGC from executing without an approval record attached to the affected mapping record.

Answer: A

Question: 200

Deep Dumps

A CMDB Administrator is leveraging CI data as part of an Integrated Risk Management implementation and the Entity Scoping process. The Administrator wants to leverage the CSDM Data Foundations Dashboard playbooks under the Run tab. Which CSDM relationships are leveraged using the CSDM playbooks?

- A. Business Applications that have relationships to Application Services
- B. Business Applications that have their relationships to Information Objects
- C. Locations that have established parent records
- D. Logical CIs that have relationships with Information Objects

Answer: A

Question: 201

Deep Dumps

The Server [cmdb_ci_server] class uses a dynamic reconciliation rule of lowest value for the Disk Space (GB) field, while the Windows Server [cmdb_ci_win_server] class uses a dynamic reconciliation rule of most reported for the Disk Space (GB) field. Given the following data sources that populate Windows Server data into the CMDB

360/Multisource CMDB:  Which value would be added to the CMDB for the Disk Space (GB) field of a Windows Server [cmdb_ci_win_server] record?

- A. 80
- B. 75
- C. 50

Answer: B

Question: 202

Deep Dumps

A Configuration Manager needs to enable a CMDB Data Manager policy to remove records from a CI Class while retaining the ability to restore them within a specified period. Which policy type should the Configuration Manager create?

- A. Archive
- B. Retire
- C. Certification
- D. Delete

Answer: A

Question: 203

Deep Dumps

A CMDB Administrator wants to start utilizing the CMDB Health Dashboard and its Key Performance Indicators. What does the Administrator do to start using the dashboard?

- A. Nothing, the dashboard is activated by default
- B. Activate the dashboard scheduled jobs
- C. Download the dashboard from the ServiceNow store
- D. Activate the dashboard system property

Answer: B

Question: 204**Deep Dumps**

The CMDB Administrator group seeks to filter specific CI classes that display on the CMDB Health Dashboard. This ensures that only relevant data is displayed, excluding items that are not ready for management. Which feature can the group utilize to achieve this goal?

- A. Data Refresh Rules
- B. Identification Rules
- C. Reconciliation Rules
- D. Health Inclusion Rules 

Answer: D**Question: 205****Deep Dumps**

A CMDB Administrator needs the fastest time to value solution for effectively ingesting, managing, and maintaining CIs and relationships. Which management tool will accomplish this to import Windows computer data from SCCM?

- A. IntegrationHub ETL connection to SCCM using Robust Transform Engine (RTE)
- B. Import set using JDBC data source connection to SCCM using transform maps
- C. SCCM Usage Metering Spoke
- D. SCCM Service Graph Connector

Answer: D**Question: 206****Deep Dumps**

Choose 2 option. An organization is updating the CMDB to include new asset types like IoT devices. Relevant CI classes need to be added and outdated ones need to be removed from the Principal Class filter to ensure accurate display in ITSM processes. Which roles are needed to add or remove classes?

- A. sn_cmdb_admin
- B. personalize_dictionary
- C. cmdb_query_builder
- D. sn_csdm_admin

Answer: A,B**Question: 207****Deep Dumps**

Choose 2 option. Which ServiceNow solutions automatically create relationships between CI Applications that are part of an Application Service?

- A. IntegrationHub ETL
- B. Service Mapping
- C. Event Management
- D. Discovery
- E. Data Manager

Answer: B,D

Question: 208

Deep Dumps

A Configuration Manager responsible for a specific region wants to use the CMDB Health Dashboard to improve the data quality of the CMDB for that region. The Configuration Manager only sees the overall score and grouped by CI Class. How can the Configuration Manager get a score for regionally relevant CIs?

- A. Customize the CMDB Health Dashboard scheduled jobs to group the results by region
- B. Create CMDB groups with type, health, by region
- C. On the CMDB health settings, activate the option, Group scores by region

Answer: B

Question: 209

Deep Dumps

Choose 2 option. An organization is using CMDB Query Builder to find all application services with a database that has incidents and all infrastructure in those application services. Which steps does the organization take to build this query?

- A. Add a non-CMDB table to the query
- B. Use a Service Mapping Query to find all incidents related to the database
- C. Use a CMDB Query to include application services and their related infrastructure
- D. Use a Service Mapping Query to include non-CMDB tables like the Incident table

Answer: A,C

Question: 210

Deep Dumps

Choose 2 option. A CMDB Administrator uses the CMDB Data Foundations Dashboard to gain insights into the CMDB. The results display low scores for several metrics. Which actions can the CMDB Administrator take to improve the CMDB Health?

- A. Focus on metric(s) with Critical and High priorities
- B. Remove non-operational and retired CIs
- C. Adjust the metrics using exclusion rules to improve the scores
- D. Use the Remediation Playbooks linked beside each metric

Answer: AD

Question: 211

Deep Dumps

A CMDB Administrator needs to prevent duplicate CI creation from import sets that load data into the CMDB from vendor shipment files containing CI information. How can the Administrator do this?

- A. Use the CMDBTransformUtil API in the transform script
- B. Create comparison rules in the IRE
- C. Set the system property to utilize the IRE within transform maps

D. Set the coalesce on two mappings within the transform map

Answer: A

Question: 212

Deep Dumps

A CMDB Data Owner has requested better insights on the different data sources that make up the CMDB data set. The Platform Owner knows that the new Service Graph Connector Central plugin is just what is needed. After installing the plugin, what workspace will have the new Service Graph Connector Central tab available?

- A. CMDB Workspace
- B. Service Graph Connector Workspace
- C. Discovery Admin Workspace

Answer: B

Question: 213

Deep Dumps

Choose 2 option. A CMDB Manager wants to start adding CSDM design and planning (design) domain components into the CMDB. Who is involved in this exercise?

- A. Enterprise Architect
- B. Business Relationship Manager
- C. Application Service Owner
- D. Application Owner

Answer: AB

Question: 214

Deep Dumps

A Configuration Manager working in the CMDB Workspace wants to see how CIs are connected to each other. Which tool can be used?

- A. Business Service Map
- B. Unified Map
- C. Relationship Map

Answer: B

Question: 215

Deep Dumps

A Configuration Manager needs to ingest third-party CIs into the CMDB. Which method minimizes the risk of technical debt?

- A. Vendor-provided integration
- B. Import Sets and Transform Maps
- C. Table API
- D. Service Graph Connector

Answer: D

Question: 216

Deep Dumps

Which shows the most complete list of policy types that are provided by the CMDB Data Manager?

- A. Delete, Attestation, Retire, and Certification
- B. Attestation, Retire, and Certification
- C. Retire, Archive, Attestation, Certification, and Delete
- D. Archive and Delete

Answer: C

Question: 217

Deep Dumps

Choose 2 option. CMDB Administrator wants to leverage the CMDB Data Foundations Dashboard. What are benefits of using this application?

- A. Uses automation to remediate potential risks
- B. Has a framework to create custom metrics for the CMDB
- C. Checks that important data is valid and properly configured
- D. Provides playbooks to assist in the remediation of potential risks

Answer: C,D

Question: 218

Deep Dumps

A CMDB CI Class Owner has been asked to change the icon for the UNIX Server class. Which CI Class Manager tab can the owner use to change the icon for the class?

- A. Suggested Relationships
- B. Basic Info
- C. CI List
- D. Attributes

Answer: B

Question: 219

Deep Dumps

A CMDB team has noticed that some hardware CIs are missing the serial number information, making it difficult to maintain data accuracy. The team needs a structured approach to identify and address these gaps. Which accomplishes this task?

- A. CMDB Data Foundation Playbook
- B. Service Graph Connectors
- C. CI Class Manager

Answer: A

Question: 220

Deep Dumps

A CMDB Administrator wants to leverage dynamic reconciliation rules. Which feature must be enabled?

- A. CMDB 360/Multisource CMDB
- B. CMDB Data Manager
- C. CMDB Workspace
- D. Reconciliation Rules

Answer: A

Question: 221

Deep Dumps

Where does a user with the appropriate role(s) review and manage the generated tasks after configuring CMDB Data Manager policies?

- A. CMDB Health Dashboard > Audit tab
- B. CMDB Workspace > Management tab
- C. CMDB Workspace > My Work tab
- D. CMDB Health Dashboard > Duplicate CIs tab

Answer: C

Question: 222

Deep Dumps

Choose 2 option. Which are CMDB Data Manager end of life policy types?

- A. Lost
- B. Decommission
- C. Archive
- D. Disposed
- E. Retire

Answer: C,E

Question: 223

Deep Dumps

A CMDB Configuration Manager intends to implement CMDB Data Manager delete and archive policies for all server records in the New York datacenter. In which lifecycle state would servers be affected by these new policies?

- A. End of Life - Retired
- B. In any lifecycle state
- C. Missing - Stolen
- D. Inventory - Available

Answer: A

Question: 224

Deep Dumps

How does a CMDB Administrator use the ServiceNow Platform to ensure the data quality associated with Cls in the CMDB?

- A. Data Quality Business Rule
- B. Data Quality Scheduled Job
- C. CMDB Workspace
- D. CMDB Audit Business Rule

Answer: C

Question: 225

Deep Dumps

Choose 2 option. The Incident Process Owner asks which classes of CSDM are used on the Incident form. Which classes are appropriate?

- A. Business Application
- B. Application Service
- C. Service Portfolio
- D. Service Offering

Answer: B,D

Question: 226

Deep Dumps

The ITSM Manager wants to use Technology Management Offerings (Technical Service Offerings) to populate the support group of associated Cls. What CSDM stage would this be completed in?

- A. Walk
- B. Run
- C. Foundation
- D. Crawl
- E. Fly

Answer: A

Question: 227

Deep Dumps

The Application Portfolio Management team is asking for help modeling platforms as Business Applications. How would this be mapped in CSDM using the ServiceNow Platform in the Incident and Change applications?

- A. ServiceNow Platform would be an Architecture type of Platform Host. Incident and Change would be Platform Applications. Then a Depends On relationship would be created between ServiceNow Platform and Incident and Change.
- B. ServiceNow Platform, Incident, and Change would all be web based Architecture type. A Depends On

relationship would be created between ServiceNow Platform and Incident and Change.

C. ServiceNow Platform, Incident, and Change would all be web based Architecture type. Incident and Change would have a reference to ServiceNow Platform.

D. ServiceNow Platform would be an Architecture type of Platform Host. Incident and Change would be Platform Applications and have a reference to ServiceNow Platform.

Answer: A

Question: 228

Deep Dumps

A CMDB Administrator is implementing a Vulnerability Response or Security Incident Response and needs to ensure customers have enough context to estimate risk and set task priorities. Which Get Well Playbook from the CSDM Data Foundations Dashboard helps with this?

- A. Application Services with Business Application Relationships
- B. Named Product Models without Product Owners
- C. Locations without a Parent Location
- D. Percentage of Custom Status Values for CI Life Cycle Stages

Answer: A

Question: 229

Deep Dumps

When integrating data into the CMDB using import sets and transform maps, which type of script is added to ensure the data is processed through the IRE?

- A. onComplete
- B. onBefore
- C. onStart
- D. onAfter

Answer: B

Question: 230

Deep Dumps

A CMDB Administrator has been tasked with gathering information for a presentation to leadership. The Administrator needs to provide Duplicate CI, Orphan CI and Stale CI metrics. Which scorecard provides this information on the CMDB Health Dashboard?

- A. Compliance
- B. Correctness
- C. Completeness

Answer: B

Question: 231

Deep Dumps

A CMDB Administrator is reviewing the health of the CMDB and notices a large percentage of the Hardware CIs

are missing serial numbers. The Administrator is concerned this may cause duplicate CIs and would like to resolve the issue in a timely manner. What structured guidelines provided by ServiceNow are available to troubleshoot and resolve the issue?

- A. CMDB Health Dashboard Playbooks
- B. CMDB Data Foundations Dashboard Playbooks
- C. CSDM Data Foundations Dashboard Playbooks
- D. CSDM Now Create Playbooks

Answer: A

Question: 232

Deep Dumps

A CMDB Administrator needs to import external data into the CMDB. As the CMDB Administrator wants to reduce the risk for creating duplicates and to update information from unauthorized sources, it has to be ensured that the Identification and Reconciliation API will not be bypassed. What is the recommended method to import data into the CMDB utilizing the Identification and Reconciliation API?

- A. IntegrationHub ETL
- B. Table API (REST API or SOAP API)
- C. Import Sets and Transform Maps

Answer: A

Question: 233

Deep Dumps

A CMDB Administrator wants only the CIs of Principal Classes to appear in CI reference fields, for example the CI reference fields accessible from an Incident Form. Where does the CMDB Administrator designate Principal Classes?

- A. CMDB Workspace
- B. CI Class Manager
- C. CMDB Data Manager
- D. System Properties

Answer: B

Question: 234

Deep Dumps

Choose 2 option. A CMDB Administrator wants to run the Services Have Owners Identified playbook to remediate the issues shown in the CMDB Data Foundations Dashboard. Which remediation plays would be used?

- A. Analyze Data
- B. Fix Data ☒
- C. Govern Data ☒
- D. Report Data

Answer: B,C

Question: 235**Deep Dumps**

Choose 2 option. A CMDB Administrator is evaluating whether to monitor the metrics provided on the CMDB Data Foundation Dashboard. Which benefits support the decision to continually monitor the results on this dashboard?

- A. Provides a list of all CIs that failed health audits
- B. Provides metrics on active CIs updated in the last 90 days
- C. Reports on all orphan CIs in the CMDB
- D. Provides metrics for CIs Processed by the IRE

Answer: B,D**Question: 236****Deep Dumps**

A CMDB Administrator would like to minimize stale CIs in the CMDB. Which CMDB Health Dashboard scorecard displays this information?

- A. Compliance
- B. Completeness
- C. Correctness

Answer: C**Question: 237****Deep Dumps**

A Configuration Manager wants to use the Unified Map. Where would it be accessed?

- A. CMDB Workspace
- B. CI Class Manager
- C. CMDB Data Manager

Answer: A**Question: 238****Deep Dumps**

The CMDB Administrator has set-up two Dynamic Reconciliation Rules within the ServiceNow Production Instance. The 'Server' class has a Dynamic Reconciliation Rule of largest value for the RAM field. The 'Windows Server' class

has a Dynamic Reconciliation Rule of most reported for the RAM field.  Given the above data in the Multisource CMDB, which value would be added to the CMDB for RAM for a 'Server' CI?

- A. 8.192 MB
- B. 2.048 MB
- C. 4.096 MB

Answer: A**Question: 239****Deep Dumps**

Choose 2 option. With CMDB 360/Multisource CMDB the Dynamic Reconciliation Rules will also be enabled. Based on the request of the management, a CMDB Administrator has to set up multiple Dynamic Reconciliation Rules. Which are available 'Dynamic Rule Types' within the 'Create Reconciliation Rule' wizard?

- A. Most Reported
- B. Last Updated
- C. Last Created
- D. Smallest Value

Answer: A,D

Question: 240

Deep Dumps

A CMDB Administrator identifies duplicate CIs. One was created by a manual import, and the other one was created by automated discovery. The discovered CI has the latest IP address, while the manually imported CI has an accurate relationship to a critical business application. How does the Administrator use the Duplicate CI Remediator to resolve this issue?

- A. Retain the discovered CI, and delete the manually imported CI
- B. Retain the manually imported CI, and delete the discovered CI
- C. Merge the two CIs automatically, retaining all attributes from the discovered CI
- D. Retain the discovered CI, but merge the relationship from the manually imported CI

Answer: D

Question: 241

Deep Dumps

A CMDB Administrator needs to identify which attributes have been created specifically for the Windows Server class. Which tab in the Attributes section is used?

- A. Child
- B. Added
- C. Derived
- D. All

Answer: B

Question: 242

Deep Dumps

The CMDB Administrator group aims to display meaningful results on the CMDB Health Dashboard Compliance Scorecard for server records that are not on the latest patch. What must be configured to achieve this goal?

- A. Technical Service Offerings, Dynamic CI Groups, CMDB Groups
- B. Stale, Orphan, Duplicate
- C. Certification Filter, Certification Template, Audit
- D. Certification Policies, Data Filters, Scheduled Jobs

Answer: C

Question: 243**Deep Dumps**

A CMDB Administrator has installed a Service Graph Connector and customized a script transform. What will happen on subsequent upgrades if the default definition of the script transform is updated?

- A. A skipped change is created and no change is made to the script transform definition.
- B. The upgrade stops and reports an error.
- C. The Service Graph Connector upgrade refuses to start.

Answer: A**Question: 244****Deep Dumps**

The CMDB Configuration Manager is using the CI Class Manager to manage the group ownership of CI classes and needs to leverage the ownership value specified in the CI Class Manager. When configuring a CMDB Data Manager policy, which group reference field should be set?

- A. Change Group
- B. Approval Group
- C. Support Group
- D. Managed By Group

Answer: D**Question: 245****Deep Dumps**

A new custom class is needed to reflect a new application being managed in the CMDB. Which roles are minimally needed to add this custom CI class?

- A. data_classification_admin and personalize_dictionary
- B. sn_cmdb_admin and personalize_dictionary
- C. cmdb_inst_admin and personalize_form
- D. itil_admin and personalize_form

Answer: B**Question: 246****Deep Dumps**

Choose 2 option. A CMDB Administrator wants to create a CMDB query to find all databases located in Seattle that are connected to application services. They also want to include incidents related to those databases. Which actions does the company take to build this query?

- A. Add a filter to the database node for location = Seattle
- B. Set the relationship level to 'Up to 2nd level relationships'
- C. Add to the canvas the Incident table from the Non-CMDB Tables list
- D. Add property columns to the application service node

Answer: A,C

Question: 247**Deep Dumps**

Which type of CMDB Data Manager policy creates tasks that allow the assigned individual to update fields on the CI record?

- A. Attestation
- B. Compliance
- C. Certification
- D. Audit

Answer: C**Question: 248****Deep Dumps**

What ensures data volume in the CMDB is manageable?

- A. Scheduled Jobs
- B. Business Rules
- C. Archive Policies 

Answer: C**Question: 249****Deep Dumps**

A CMDB Administrator has built a number of Technology Management Service Offerings (Technical Service Offerings) based on Dynamic CI Groups to better maintain group alignment for the member CI. Which Groups are synced to CIs from the offering that has a relationship to a Dynamic CI Group?

- A. Managed by Group
- B. Approval Group
- C. Owned by Group
- D. Support Group

Answer: A**Question: 250****Deep Dumps**

Which is a purpose or requirement of CMDB Data Manager in ServiceNow?

- A. Automates the archival and deletion of records based on retention policies
- B. Encrypts archived records for enhanced security
- C. Automates the enforcement of relationship rules between CIs in the CMDB

Answer: A**Question: 251****Deep Dumps**

A customer wants recently imported server records to be automatically reclassified into more specific CMDB

classes after being discovered using ServiceNow Discovery. During the discovery process, if existing Server [cmdb_ci_server] records are reclassified into the Linux [cmdb_ci_linux_server] and Windows Server [cmdb_ci_win_server] classes, which reclassification operation occurred?

- A. Class Downgrade
- B. Class Switch
- C. Class Upgrade

Answer: C

Question: 252

Deep Dumps

A CMDB Administrator wants to improve data quality related to the CSDM. Which action should the Administrator take to meet this goal?

- A. Start the ServiceNow Health Scan
- B. Use the CSDM Data Foundations Dashboard
- C. Use the default configured CMDB Health Dashboard

Answer: B

Question: 253

Deep Dumps

A CMDB Manager wants to improve data quality using the CMDB Health Dashboard. What needs to happen to generate CMDB health scores?

- A. The scheduled jobs for the CMDB Health Dashboard must be activated
- B. The plugin, CMDB health calculation, needs to be installed
- C. Nothing, CMDB health scores are calculated by default

Answer: A

Question: 254

Deep Dumps

Choose 2 option. Configuration Management requires an accurate inventory of devices to be reflected in the CMDB. Which are common use cases for using Agent Client Collector (ACC)?

- A. Network devices in the DMZ
- B. Devices in secure environments
- C. Devices that intermittently connect to the network
- D. Servers in the data center

Answer: B,C

Question: 255

Deep Dumps

A CMDB Data Manager needs to access the ServiceNow platform to create, publish, and manage policies that automate and govern CI lifecycle operations, ensuring the CMDB remains healthy and efficient. Where can the Data Manager do this?

- A. CMDB Workspace Management tab
- B. Service Operations Workspace
- C. CMDB Workspace CMDB 360 tab
- D. CI Class Manager

Answer: A

Question: 256

Deep Dumps

Choose 2 option.A CMDB Administrator is considering whether to start using the playbooks provided on the CMDB Data Foundation Dashboard.What are the benefits to support the decision to leverage this feature?

- A. Offers insight into the downstream impacts of poorly performing metrics
- B. Offers remediation options to address and improve poorly performing metrics
- C. Offers automated scripts to resolve poorly performing metrics
- D. Offers remediation templates to improve poorly performing metrics

Answer: A,B

Question: 257

Deep Dumps

A CMDB Administrator, viewing the CMDB Data Foundations Dashboard, notices the Unique Locations Result percentage low.What is the recommended process from the associated playbook to correct this issue?

- A. Use the Duplicate CI Remediator to merge the duplicate location records
- B. Keep both locations as either can be used as a valid alternate location
- C. Review both locations, update CIs with the correct location and delete the duplicate location
- D. Retain the location that matches the organization's standard naming convention, and delete the duplicate without further validation

Answer: C

Question: 258

Deep Dumps

A CMDB Administrator needs insights into how their CMDB is configured according to ServiceNow recommended practice.Which should be used?

- A. CMDB Data Foundation Dashboard
- B. CMDB Workspace
- C. CMDB Data Manager
- D. CMDB Health Dashboard

Answer: A

Question: 259

Deep Dumps

A Configuration Management team has decided to start taking advantage of the CMDB 360/Multisource CMDB

functionality.Which system property must be enabled?

- A. glide.identification_engine.multisource.query.max.limit
- B. glide.identification_engine.multisource_non_cmdb_ci_enabled
- C. glide.identification_engine.multisource_cmdb_ci_enabled
- D. glide.identification_engine.multisource_enabled

Answer: D

Question: 260

Deep Dumps

Where can an administrator perform Natural Language Queries (NLQ)?

- A. CMDB Health Dashboard
- B. CMDB Workspace
- C. CMDB Data Manager
- D. CI Class Manager

Answer: B

Question: 261

Deep Dumps

A CMDB Administrator aims to utilize CSDM life cycle field mappings to better align with CSDM best practices.What is the next step to take after selecting the Enable Life Cycle Sync button?

- A. Fix the incorrect values in the Life Cycle Stage to match legacy values
- B. Resolve any incomplete field mappings identified in the Discrepancy Report
- C. Activate the CSDM Life Cycle field mappings

Answer: B

Question: 262

Deep Dumps

A health organization must track certain data (for example, regulated patient information) and its relation to Business Applications.Which action does CSDM recommend to meet this goal?

- A. Create an Information Object to represent the patient information, and then link it through a relationship to the Business Application after consulting with the Application owner.
- B. Create fields on the Business Application record to mark the Business Application as containing patient information, and then ask the Business Application owner to mark the application as having patient information or not.
- C. Work with the Database administration team to classify the data on each database that holds patient information, and then use Relationships to map that back to the Business Application.

Answer: A

Question: 263

Deep Dumps

A Configuration Management Governance team is transitioning from utilizing legacy CMDB status fields to CSDM life cycle status fields. Which table can be modified?

- A. Life Cycle Controls [life_cycle_control]
- B. Life Cycle Stage Status [life_cycle_stage_status]
- C. Life Cycle Stages [life_cycle_stage]
- D. Life Cycle Mapping [life_cycle_mapping]

Answer: D

Question: 264

Deep Dumps

Choose 2 option. What types of policies can be created within CMDB Data Manager?

- A. Retire
- B. De-duplication
- C. Archive
- D. Reconciliation

Answer: A,C

Question: 265

Deep Dumps

An organization utilizes multiple data sources to update its CMDB, each assigned a different priority level. A high-priority data source is scheduled to update server records weekly. However, due to an integration issue, the high-priority data source stops updating the records. Which configuration can be used to allow a lower-priority data source to update records after a specified period of inactivity from the higher-priority source?

- A. Reconciliation Rules
- B. Data Refresh Rules
- C. Identification Rules
- D. Health Inclusion Rules

Answer: B

Question: 266

Deep Dumps

The CMDB Configuration Management team wants to manage de-duplication tasks generated from data ingested into the CMDB via the Identification and Reconciliation Engine (IRE). In which area of the CMDB Workspace can they locate these de-duplication tasks?

- A. Total status tile under the My Work tab
- B. CMDB feature adoption tile under the Insights tab
- C. Important actions tile under the Home tab

Answer: C

Question: 267**Deep Dumps**

A CMDB Administrator is creating technical documentation for stakeholders, which includes a list of attributes, Identification and Reconciliation Engine (IRE) rules, and suggested relationships for several classes. Which central location does the CMDB Administrator use to collect this information?

- A. CMDB Data Manager
- B. CI Class Manager
- C. CI Identifiers
- D. CMDB Workspace

Answer: B**Question: 268****Deep Dumps**

A CMDB Manager uses CMDB 360/Multisource CMDB to maintain and improve CMDB quality. Why would the Manager use CMDB 360/Multisource CMDB?

- A. To identify CI attributes from multiple data sources
- B. To ingest data from multiple data sources using Import Set(s)
- C. To ingest data from multiple data sources using Service Graph Connector(s)
- D. To populate the CMDB from multiple data sources

Answer: A**Question: 269****Deep Dumps**

A CMDB Administrator needs to ingest relevant data from Microsoft SCCM into the CMDB. Which ingestion method brings the fastest time to value?

- A. Agent Client Collector
- B. Service Graph Connectors
- C. IntegrationHub ETL
- D. Import Sets

Answer: B**Question: 270****Deep Dumps**

A CMDB Administrator group aims to establish a process for receiving task notifications when the Support Group or Managed By Group fields are not populated for operational Linux servers stored in the CMDB. Which ServiceNow modules can be leveraged to configure recommended fields and generate task records in cases where these fields are missing for Linux servers in the CMDB?

- A. Technical Service Offerings and Dynamic CI groups
- B. CMDB Workspace and Scheduled Jobs
- C. CI Class Manager and Health Preferences
- D. Dynamic CI groups and CMDB groups

Answer: C

Question: 271

Deep Dumps

A data center has many servers. The CMDB Administrator wants to confirm that all servers exist. Which Data Manager policy type does the Administrator implement?

- A. Promotion
- B. Verification
- C. Attestation
- D. Certification

Answer: C

Question: 272

Deep Dumps

The Configuration Management team wants to confirm that all servers in the CMDB actually exist in the data center. Which CMDB Data Manager policy type would the team create?

- A. Retire
- B. Attestation
- C. Delete
- D. Certification
- E. Archive

Answer: B

Question: 273

Deep Dumps

A CMDB Administrator has a number of similar de-duplication tasks that need to be remediated in bulk. How does the Administrator achieve this?

- A. Utilize the Duplicate CI Remediator Wizard
- B. Create and run a de-duplication template
- C. Configure and run a custom de-duplication background script
- D. Create de-duplication tasks manually and remediate each

Answer: B

Question: 274

Deep Dumps

A Windows server is reclassified from the Server table [cmdb_ci_server] to the Windows Server table [cmdb_ci_win_server] when processed through the Identification and Reconciliation Engine (IRE). Which process occurred?

- A. Class Downgrade
- B. Class Upgrade
- C. Class Change

D. Class Switch

Answer: B

Question: 275

Deep Dumps

Choose 2 option.A Windows administration team wants a grouping of CIs using CMDB groups.Which methods can be used?

- A. Encoded queries
- B. Saved queries
- C. Scripted queries
- D. Tag-based queries

Answer: A,B

Question: 276

Deep Dumps

A CMDB Administrator knows that the CMDB Data Foundation Dashboard is a resource to monitor and improve data quality.What is a benefit of this dashboard?

- A. Provides the ability to configure health-related metrics
- B. Provides key health-related metrics to make decisions
- C. Provides the ability to resolve certification policy tasks

Answer: B

Question: 277

Deep Dumps

The CMDB Administrator wants to leverage the Staleness metric from the CMDB Health Dashboard - Correctness Scorecard.Which field is used to calculate the duration of this metric?

- A. First discovered (first_discovered)
- B. Created (sys_created_on)
- C. Most recent discovery (last_discovery)
- D. Last modified on (last_modified)
- E. Updated (sys_updated_on)

Answer: C

Question: 278

Deep Dumps

A CMDB Administrator needs to track which CIs and CI classes are missing key data.Which CMDB Health Dashboard scorecard supports tracking this requirement?

- A. Correctness
- B. Compliance

C. Completeness

Answer: C

Question: 279

Deep Dumps

A CMDB Administrator is asked to clean up the CMDB duplicates.What is the preferred way to manage this task?

- A. The de-duplication task module
- B. The de-duplication dashboard on the CMDB workspace
- C. My Tasks in the Application Navigator

Answer: B

Question: 280

Deep Dumps

A Configuration Management Governance team is transitioning from utilizing legacy CMDB status fields to CSDM life cycle status fields.Which table can be modified?

- A. Life Cycle Controls [life_cycle_control]
- B. Life Cycle Stage Status [life_cycle_stage_status]
- C. Life Cycle Stages [life_cycle_stage]
- D. Life Cycle Mapping [life_cycle_mapping]

Answer: D

Question: 281

Deep Dumps

What is the value of using the CMDB in security operations?

- A. Auto-resolves a vulnerability
- B. Allows security team to assess and remediate an incident
- C. Enables audits and attestations across CIs
- D. Identifies the IT infrastructure with a vulnerability

Answer: D

Question: 282

Deep Dumps

A ServiceNow Administrator needs to create multiple new classes in the CMDB but wants to follow ServiceNow's best practices for naming CMDB tables to prevent technical debt.Which is the starting prefix for all custom CMDB tables?

- A. u_ci_cmdb
- B. ci_cmdb
- C. cmdb_ci
- D. u_cmdb_ci

Answer: D

Question: 283

Deep Dumps

A CMDB Administrator has a report in ServiceNow that lists all CMDB Services that do not have an owner and wants to use a ServiceNow Playbook.What Governance process play can prevent this from recurring?

- A. Make the field Managed by mandatory on all CIs
- B. Set a default value on the Service Owner field so that is never empty
- C. Make the field Owned by mandatory

Answer: C

Question: 284

Deep Dumps

A CMDB Administrator has imported data into the ServiceNow CMDB from a third-party source using a Service Graph Connector. The Administrator wants to review specific field to field mappings for the import.Which feature will show that information?

- A. Integration Hub
- B. IntegrationHub ETL
- C. CMDB Integrations Dashboard

Answer: B

Question: 285

Deep Dumps

A CMDB Administrator is comparing the Unified Map to the Service Mapping map.What are additional capabilities of the Unified Map?

- A. Map can be zoomed in and out
- B. Visibility to an application and the host it is installed on
- C. Number of levels displayed on a map can be modified
- D. Map nodes can be filtered based on user preferences

Answer: D

Question: 286

Deep Dumps

A Configuration Manager is managing a CI class in the CMDB. The identification rule(s) needs an update.Where can the Configuration Manager view and configure the existing identification rule(s) for the class?

- A. IRE Application
- B. API Integrations
- C. CI Class Manager
- D. CI Identifiers module

Answer: C

Question: 287

Deep Dumps

The Configuration Management team finds value in the reports from CMDB 360/Multisource CMDB and wants to use it for all CI data. Which must be true in order for CMDB 360/Multisource CMDB to be able to report on and analyze that data?

- A. ServiceNow Discovery must be used to populate the CI data.
- B. The CI data must go through the IRE
- C. The CI data must be from an authorized Service Graph Connector.
- D. Reconciliation rules with priorities must be configured.

Answer: B

Question: 288

Deep Dumps

Where can a CMDB 360/Multisource CMDB Saved Query be viewed and created in the CMDB Workspace?

- A. Saved queries window on the CMDB 360 tab
- B. Saved queries window on the Insights tab
- C. Coverage window on the CMDB 360 tab
- D. CMDB Query Builder

Answer: A

Question: 289

Deep Dumps

A CMDB Administrator is beginning the journey of populating the CMDB and needs to verify that any data which is no longer useful/applicable is removed. Which governance management tool will accomplish this?

- A. CMDB and CSDM Data Foundations Dashboard
- B. CMDB Data Manager
- C. CMDB Health Dashboard
- D. CI Class Manager
- E. De-duplication Templates

Answer: B

Question: 290

Deep Dumps

User endpoint devices are imported into the CMDB and populate the 'Assigned to' [assigned_to] field on the Computer [cmdb_ci_computer] CI. The Asset team puts in a request for the Configuration Analysts to populate the 'Assigned to' field on the related Asset. What action does a Configuration Analyst take to achieve this in an automated way?

- A. Use the Asset-CI Field Mapping module to create a new rule to replicate the 'Assigned to' value between the asset and associated CI

B. Hide the 'Assigned to' field on the asset record and create a new field that dot walks to the related CI to get the 'Assigned to' value

C. Configure a business rule on the computer table to use a script to populate the 'Assigned to' field on the asset based on insert or update in the computer class 'Assigned to' field

Answer: A

Question: 291

Deep Dumps

Choose 2 option.What are the characteristics or functions of ServiceNow IntegrationHub ETL?

- A. Performs discovery data collection and updates the CMDB
- B. Integrates third-party data into the CMDB or into non-CMDB tables
- C. Uses the IRE to process and integrate data
- D. Imports Microsoft SCCM/Intune data into the CMDB

Answer: B,C

Question: 292

Deep Dumps

A CMDB Administrator wants to educate the team on the various actions that can be performed within the CMDB Workspace.What actions can be initiated from the CMDB Workspace?

- A. Create a new CMDB class
- B. Execute ServiceNow Discovery
- C. Remediate duplicate CI records
- D. Create a CMDB Data Manager certification policy

Answer: C

Question: 293

Deep Dumps

A CMDB Administrator wants to ensure that only relevant CIs from managed classes will be shown on Incident, Problem, and Change records.Which checkbox needs to be checked in the CI Class Manager for the CMDB Administrator to achieve the requested result?

- A. Principal Class 
- B. Main Record
- C. Independent
- D. Extensible

Answer: A

Question: 294

Deep Dumps

A CMDB Administrator wants to ensure all short-lived CIs that have not been discovered in the past week are removed.After retiring the CI records, which recommended action does the CMDB Administrator take?

- A. Create a delete policy
- B. Create a scheduled job
- C. Create a business rule

Answer: A

Question: 295

Deep Dumps

A CMDB Administrator needs to set a CI Class as a Principal Class. Which CI Class Manager tab would need to be accessed?

- A. Class Info > Basic Info
- B. Health > Attributes
- C. Class Info > Attributes

Answer: A

Question: 296

Deep Dumps

A CMDB Administrator changes the query for the SCCM Service Graph Connector. What is the impact of this change?

- A. Any updates for the SCCM Service Graph Connector will be skipped during the upgrade.
- B. Any Scheduled Jobs for the SCCM Service Graph Connector will need to be configured.
- C. The Data Source for the SCCM Service Graph Connector will be marked as Inactive.

Answer: A

Thank you

Thank you for being so interested in the premium exam material.
I'm glad to hear that you found it informative and helpful.

If you have any feedback or thoughts on the bumps, I would love to hear them.
Your insights can help me improve our writing and better understand our readers.

Best of Luck

You have worked hard to get to this point, and you are well-prepared for the exam
Keep your head up, stay positive, and go show that exam what you're made of!
